## HOW RHEUMATISM **BEGINS**

The excruciating agonies of rheumatism are usually the result of failure of the kidneys to expel poisons from the system. If the irritation of these uric acid crystals is allowed to continue, incurable bladder or kidney disease may result. Attend to it at once. Don't resort to temporary relief. The sick kidneys must be restored to bealth by the use of some sterling remedy which will prevent a return of the disease.

Get some GOLD MEDAL Haarlem Off Capsules immediately. They have brought back the joys of life to countless thousands of sufferers from rheumatism, lame back, lumbago, aciatica, gall stones, gravel and other affections of the kidneys, liver, stomach, bladder and allied organs.

They will attack the poisons at once, clear out the kidneys and urkary tract and the soothing healing oils and herbs will restore the inflamed tissues and organs to normal health.

All others are initations. Ask for GOLD MEDAL and be sure the name GOLD MEDAL and be sure the name GOLD MEDAL is on the box. Three sizes, at all good druggists,

Envelopes at the Co rier Office

There are Stores in This City so good that they could use twice as much Advertising Space as they now use-and make it pay!

The better the store the better the advertising pays. Your own observations in the store-world will confirm this truth.

Publicity is bad only for a bad proposition. It is just as surely good for a good one.

What is a "good store?" One that really serves the public, protecting its patrons as to values, not merely as to prices.

There are many stores in this city answering to that definition completely. In every city there are always some stores that do not.

An important phase of a good store's service to its patrons is its newspaper advertising. This should be complete, frank, informing. It should tell the store news as fully as a good newspaper tells the news-of the day.

Perhaps the best possible new policy for the good stores of this city to adopt would be that of doubling the advestising space that they use—thus giving them "elbow room;" giving them bigger opportunities for telling their patrons, in detail, about every selling event, about every bargain offering, about every dollar's worth of new stocks. Of course, even half enough advertising pay the really good store; but adequate advertising would pay much better.

TUBERCULOSIS LOSS IS BIG

Federal Government Bears Partial Loss of Animals Slaughtered Because of Infection.

(Prepared by the United States Depart-ment of Agriculture.)

The 1919 agricultural appropriation bill just passed by congress contains an item expected to be of great importance in the federal and state campaign to eradicate tuberculosis among cattle and swine. It provides that the tederal government shall pay indemnity to owners whose cattle are slaugh tered because they have been found infected with tuberculosis.

The department of agriculture is to pay one-third of the difference between the appraised value of the cattle and salvage value of the slaughtered animals, provided that the state, coun ty or municipality in which the cattle are owned and kept is co-operating in the tuberculosis work and pays at least an equal amount to the owner.

Entire Herd Affected With Bovine Tuberculosis.

In no case is the federal government to pay more to the owner than is paid by the state, county or municipality. No payment by the federal government is to be more than \$25 for any grade animal or more than \$50 for any purebred animal, and no payment is to be made unless the owner has compiled with all quarantine regulations.

This provision is expected to remove much of the opposition among cattle owners that has hindered tuberculosis eradication work. Through it at the Courier Office. the federal government, the state, county or municipal governments and the owners of cattle will share in the loss resulting from slaughternig infected animals for the protection of other animals not infected.

Another important development extion was the unanimous adoption by breeders and live stock sanitarians of national reputation of regulations for in the evening g there where the accrediting pure-bred herds of cattle, hearth. For it is the on ach the second This action, taken last December, hear about us at here that the state of the state marked the co-ordination of efforts of individuals and the state and federal governments for the suppression of tuberculosis in pure-bred animals.

first Ust of herds officially accredited as free from tuberculosis. The herds numbered on that date approximately 240. The list also named herds that had passed one successful test. They must pass another annual test success tuliy before being placed on the accredited list.

The annual loss from tuberculosis among cattle and hogs is reckoned at \$40,000,000 in the United States. The federal campaign to eradicate the disease is of comparatively recent beginning. It has been divided into three well-defined projects. The first project is the eradication of tuberculosis from individual herds of pure-bred cattle; the second is the eradication of cattle tuberculosis from circumscribed areas; the third is the eradication of tuberculosis among swine.

It is estimated by officials in close touch with available records that 15 per cent of pure-bred cattle in this country are affected with tuberculosis. In grade cattle and swine the percentage of infection is gradually increasing, as shown by post-mortem records in establishments where meat inspection is maintained. Infected animals are not only dangerous to other animals but may transmit the disease to mankind through milk and flesh.

## The Troubles Women Have

BY L. MAC LEAN, M. D.

BY L. MAC LEAN, M. D.

Probably no man in America was every better qualified to successfully treat the diseases peculiar to women than Dr. Pierce, of Buffalo, N. Y. The cases that come to him run into many thousands, giving him an experience that rarely comes to any one man. Dr. Pierce found that in nearly every case there were certain vegetable growths which rarely failed to give prompt relief in those feminine disorders from which so many women suffer. He combined these roots and herbs into a temperance medicine that he called Dr. Pierce's Favorite Prescription, for that is precisely what it was. This medicine is sold in both liquid and tablet form by druggists everywhere. Favorite Prescription is a distinct remedy for women and acts directly upon the organs that characterize the sex. It is not necessary to take a long course of treatment with this standard medicine. A weakly, sickly, backachy, headachy, nervous, despondent woman, with regular or irregular pains—with feminine disorders that come in youth or middle age—is pretty sure to find in Dr. Pierce's Favorite Prescription the exact remedy that her condition calls for, and to find it after a very few doses are taken. Why women should allow themselves to stay sick when a very little money spent for this remedy will orobably make them well, is something no one can explain.

All women who suffer from feminine disorders are invited to write the Faculty of the Invalids' Hotel, Buffalo, N. Y., for free confidential consultation and advice, no charge being rande for this high professional service. This will enable every woman to benefit by the advice of the distinguished corps of physicians which Dr. Pierce's Pleasant Pellets should be taken along with Favorite Preserity Pleasant Pellets should be taken along with Favorite Pleasant.
