#### CANDIDATES MUST "DOLL UP"

Will Have to Look Their Prettiest It They Expect to Find Favor With Woman Voters.

It is not necessary to go away from nome to find either the latest or best. regardless of what is wanted. Consider eyebrow arching, for instance, A Jocai beauty salon announces to the public that it does eyebrow arching, and explains that this operation "gives the eyes a deep, soulful expression with everlasting charm." Eyebrow arching advice for woman electors is more or less superfluous. It is to the men, and more especially to the men who aspire to public office, that this beauty hint is

Throughout the country women are getting the ballot on equal terms with men. Women cannot vote in Indiana, but they are going to have that privilege before long. So many women have been enfranchised that they now hold the balance of power in this nation. So the woman vote will be more and more a real political problem to the candidate.

Some electors care little for the perappearance of candidates, but most of them prefer a man of character, one who at least is presentable. Candidates in the future will have to bear this in mind. It will be well, in order to match rival candidates, for each to have a good tailor and an advisory committee on the proper shade of cravata. Immaculate linen will have to be in every candidate's platform. The high arched eyebrow will be even more essential to candidates than to the average woman. Doubtless those who have political aspirations will begin early, because eyebrow training takes time.-Indianapolis News

#### SUPPLYING WATER TO COWS

During Winter Season Temperature Should Be Kept 15 to 20 Degrees Above Freezing.

(Prepared by the United States Depart-ment of Agriculture.)

During the winter, when cows are stabled the greater part of the time. and unless arrangements have been made to keep water before them all the time, they should be watered two or three times a day. If possible, the water should be 15 to 20 degrees above the freezing point, and should be supplied at practically the same temperature every day.

# You'll Spend the Money! —Get the Most Out of It!

-Every year you spend a large proportion of the money you get. So much for clothing. So much for shoes. So much for things to eat, house furnishings, garden seeds and tools and what not.

-There's one sure way to get the most for your money. Know what you want before you go to buy.

-READ ADVERTISEMENTS. The advertisements you read will tell you what is new and good. They will' give you the latest ideas and improvements. They will help you to live better and dress better at less cost.

-If you think of it, you'll be surprised at the world of interest and the wealth of news ideas you'll find in reading advertisements.

-Advertisements are the daily record of progress. They are the report to you of the manufacturers and merchants who work for you, telling what has been accomplished for your benefit.

### ERADICATE LICE AND MITES

**Bodium Fluorid Makes an Effective** Powder and Should Be Used Freely-Use Kerosene.

(Prepared by the United States Department of Agriculture.)

The free use of an effective lice powder is always in order. Sodium fluorid makes an effective lice powder. In applying the powder hold the fowl by the feet, head down, and work the

Dusting Chicken With Sodium Fluorid a Most Effective Remedy for Lice and Mites.

powder well down into the feathers. A dust both is essential in ridding the fowls of lice.

The free use of kerosene or crude petroleum on the roosts and in the cracks will exterminate mites.

Whitewashing the interior of the house thoroughly once or twice a year helps to keep it sweet and clean.

# FOWLS FOR BREEDING STOCK

Health and Vigor Must Be First Points to Keep in Mind When Making Selection.

Eggs may be perfectly fertile and ret hatch unsatisfactorily, and the first consideration must be the production of hatching eggs with strong virile, well-nourished germs. This can be done only by a careful selection. mating and management of the breeding stock and affording the eggs the proper care after they are laid. Health and vigor must be the first points to keep in mind when selecting the breed-The rule that good seed must be used if one expects a successful crop hose of grass and grain. The breedng flock should include only sound, healthy, well-fed stock, and all fowls that have at any time suffered from any serious illness or show any faults or defects, such as crooked back or breast, hawk-bill or snake-head, pale rattling in throat, foreign growths upon any part of the body, leg weakness or string halt should be promptly discarded.

# CHILLING OF MUCH BENEFIT

Wet-Packed Poultry Arrives at Des tination in Poor Condition-Slow Railroads Blamed.

(Prepared by the United States Department of Agriculture.)

The chill room developed by the United States department of agriculture for the preservation of poultry and eggs and to prepare them for transportation to market has proved of great advantage to small poultry pack-Packers who have had to ship in less than carload quantities have found that wet-packed poultry has spolled in normous quantities because of slow transportation resulting from congestion on the railroads. Packers equipped with the small chill room recommended by the department have found that poultry dry-chilled and properly packed arrived at its destination in good condition, while wet-packed fowls in the same car were in bad order. It has been found also that the method recommended by the government requires less ice than the ice-packing process.

Remarkable "Apology."

An attorney addressed the court as 'gentlemen," instead of "your honafter he had concluded a brother of the bar reminded him of his ercor. He immediately rose and apologized thus: "May it please the coort, in the hate of debate I called yer honors gentlemen. I made a mistake, yer honors, and humbly apolo-

## LEAVES MAKE GOOD LITTER

Not Advisable to Leave Them on Floor Too Long-Throw Sweepings on Garden Patch.

There is no litter better than leaves, outside of clover or any of the dried grasses, that fowls find nourishment in. But do not allow the leaves to lie too long on the floors, as the fowls pick at them until they reduce many to almost dust. Pack away plenty in barrels, as you must be sparing of higher-priced scratching material, and throw the leaf sweepings on the gar-
