Attention—Farmers

THIS is a splendid chance for farmers to take stock on their harvesting and haying machines, or any others they will use during the year. Look each one over and note carefully any part that may need replacement. A little later you will be pressed for time and then a thorough examination will be almost impossible.

The repair problem can be much simplified by this method. While we have always tried to meet promptly every call of this kind, realizing how valuable your time is, having this advance information will aid us very much in making our service complete.

A list of your possible requirements will enable us to check up our stock of repairs to see that not a single part you might need is missing.

We want to cut to a minimum the time between the need of a repair part and its supply. This you can help us do by giving us this list before or during Repair and Inspection Week, March 3-8.
