### A Single Remedy Often Cures Many Diseases

BY VALENTINE MOTT, M. D.

It is almost impossible to give a list of the endless diseases that follow indigestion. Perhaps a whole column in this newspaper would be required to print them all. You eat to keep alive—to supply blood and flesh and bone and muscle and brain. It is easy to see that if your food is not digested and taken up by the delicate organs and distributed where it is needed, a disease of some sort is sure to come. Dyspepsia is a common symptom, and so are liver complaint, loss of flesh, nervousness, bad memory, dizziness, sleeplessness, no appetite. Many times, when neglected, indigestion results in coughs, throat diseases, catarrh, bronchitis and even more dangerous things. And all these disorders arise because the food is not properly digested in the stomach. It is plain even to a child that relief and cure are to be had only by setting up a healthy condition in the stomach. Dr. Pierce's Golden Medical Discovery grows into a temperance remedy for indigestion, and called it Golden Medical Discovery. It is probably the most efficacious discovery ever made in medicine, for the list of people all over the world who have had their countless ills overcome by Dr. Pierce's Golden Medical Discovery makes an amazing total of thousands. I know of no advice better than this: Begin a home treatment today with this good vegetable medicine. It will show you better than I can tell you what it will do. When taking Golden Medical Discovery, you can rest assured of one very important thing—it contains neither alcohol nor opiates. There is nothing in it but standard roots and herbs that possess curative properties of a high order. A safe medicine is the only kind you can afford to take.

Bees Move 150,000 Tons. The honey crop of the United States for 1918 having been estimated by the department of agriculture at about 250,000,000 pounds, the American Botanist estimates that as the nectar of flowers does not become honey until worked over and partly evaporated, the bees must move as much as 150,000 tons of material to produce this crop, exclusive of the honey eaten by themselves. Of this product, about one-half is from the nectar of white clover, with two other leguminous plants—alfalfa and sweet clover—as the next important sources.
