OLD AGE STARTS WITH YOUR KIDNEYS

Science says that old age begins with weakened kidneys and digestive organs. This being true, it is easy to believe that by keeping the kidneys and digestive organs cleansed and in proper working order old age can be deferred and life prolonged far beyond that enjoyed by the average person.

For over 200 years GOLD MEDAL Haarlem Oil has been relieving the weakness and disability due to advancing years. It is a standard old-time home remedy and needs no introduction. GOLD MEDAL Haarlem Oil is inclosed in odorless, tasteless capsules containing about 8 drops each. Take them as you would a pill, with a swallow of water. The oil stimulates the kidney

action and enables the organs to throw off the poisons which cause premature old age. New life and strength increase as you continue the treatment. When completely restored continue taking a capsule or two each day. GOLD MEDAL Haarlem Oil Capsules will keep you in health and vigor and prevent a return of the disease.

Do not wait until old age or disease have settled down for good. At the first sign that your kidneys are not working properly, go to your druggist and get box of GOLD MEDAL Haarlem Oil Capsules. Money refunded if they do not help you. Three sizes. But remember to ask for the original imported GOLD MEDAL brand. In sealed packages.

Irrigation Announcement

THE IRRIGATION AND POWER COMPANY
Grants Pass, Oregon

April 3rd, 1919.

To the Members of the
GRAVITY DISTRICT IMPROVEMENT COMPANY:
Gentlemen:

The Irrigation & Power Company will offer to construct your Gravity Ditch, or to cause the same to be constructed, and to divert water therein at its power plant at \$5.00 per acre per season for sufficient water for irrigation up to three acre feet, one-half of said \$5.00 per acre to be applied to the repayment of construction costs, the landowners to provide the right-of-way and own and operate the ditch. After construction cost is repaid, the charge will be \$2.50 an acre for balance of term of contract.

Such offer will be based on a minimum annual acreage of 1,500 acres during the contract period, which shall be for a minimum of ten years.

Under such a plan it is unnecessary to bond your lands or incur any financial burdens in the construction of the ditch, and you would pay for only such acreage as water is actually used on.

It is none too early to take up the question of your irrigation needs for 1920, as ditch work should start in September so that you may definitely know how to prepare your lands for the 1920 irrigation season. Therefore, it is suggested that your members, and other landowners west of the city, get together and work out the details of the proposition so that no unnecessary delay will be encountered in the beginning of actual construction work.

Very truly yours,

THE IRRIGATION & POWER COMPANY,
By GEO. W. SORANSON, Secretary.
