SOLDIER LETTERS

Wallace Contant Hears Highway Call Afar
Port de Tavannes, France,
March 10, 1919.

Dear Folks:
Your letter of February 9th received today when the boys returned from company headquarters. I have not received your letter of October 20th and expect it came after I left for Aix-les-Bains was misplaced by the mail orderly.

You have seen nothing of the embarkation of the 23d Engineers and from all we know now you are not likely to hear either. The 20th Engineers have not come to relieve us and I can't see where we get off until they do. It sure is hard and unjust to keep us over here, after we have been over so long, just on account of the roads when the French could do what we are doing and there is so much to do in the states.

The other four boys are playing cards over in the corner of the dug-out and I have a private office in another corner, for which the boys say I have to pay rent.

There is absolutely nothing to write about, only the weather, and that is impossible. It rains most of the time, which makes it hard to get any of the shines to do anything.

The A.E.F. is divided into military districts and we are supposed to drill forty-five minutes a day, but there are only five of us and it is about impossible for that number to drill.

No news about coming home yet. Heaps of love,
WALLACE.

WOOD BIDS WANTED

Notice is hereby given that on Tuesday, May 6, 1919, at the hour of 5 o'clock p. m. at the office of the clerk, Edward S. Van Dyke, First National Bank Building, Grants Pass, Oregon, the board of directors of School District No. 7 of Josephine county, Oregon, will receive sealed bids for the sale and delivery to the said district of 400 tiers of wood to be cut from the body of sound green timber free from rot, dot or punk, diameter to be not less than 4 inches and not larger than 10 inches, (round timber not less than seven inches and not to exceed 20 per cent of the entire delivery) and all wood to be cut and delivered in two foot lengths. Delivery to be made at the various school houses of the district at the direction of the board and well piled, ready to be measured, on the ground prior to the first day of August, 1919. Bids may be placed for the delivery of all or any part of said wood and prices may be quoted for either fir or hardwood or both.

EDWARD S. VAN DYKE, Clerk.

April 3, 1919. 45

Cuckoo Brings Good Luck

There is an old superstition prevalent in many parts of England that, if you turn the money you have in your pocket when first you hear the cuckoo in the spring, you will not suffer from lack of cash all through the year.

DAILY HEALTH TALKS

Where Most Sickness Begins and Ends

BY FRANKLIN DUANE, M. D.

It can be said broadly that most human ills begin in the stomach and end in the stomach. Good digestion means good health, and poor digestion means bad health. The minute your stomach fails to properly dispose of the food you eat, troubles begin to crop out in various forms. Indigestion and dyspepsia are the commonest forms, but thin, impure blood, headaches, backaches, pimples, blotches, dizziness, belching, coated tongue, weakness, poor appetite, sleeplessness, coughs, colds and bronchitis are almost as common. There is but one way to have good health, and that is to put and keep your stomach in good order. This is easy to do if you take Dr. Pierce's Golden Medical Discovery. It is a wonderful tonic and blood purifier, and is so safe to take, for it is made of roots and herbs. Dr. Pierce, of Buffalo, N. Y., stands behind this standard medicine, and it is good to know that so distinguished a physician is proud to have his name identified with it. When you take Golden Medical Discovery, you are getting the benefit of the experience of a doctor whose reputation goes all around the earth. Still more, you get a temperance medicine that contains not a drop of alcohol or narcotic of any kind. Long ago Dr. Pierce combined certain valuable vegetable ingredients—without the use of alcohol—so that these remedies always have been strictly temperance medicines.

If pipes are torturing you, get and use Pierce's Anodyne Pile Ointment. The quick relief it gives is hard to believe until you try it. If constipated, Dr. Pierce's Pleasant Pellets should be taken while using Anodyne Pile Ointment. Few indeed are the cases which these splendid remedies will not relieve and usually overcome. They are so good that nearly every drug store has them for sale.

FIRST-GRADE MILK

The five essentials for production of first-grade milk are:
(1) Healthy cows and men,
(2) clean cans and pails, (3) clean milking parlors, (4) covered milking pails, (5) cooling milk to 55 degrees Fahrenheit or below within an hour after production and holding it as low as possible until delivered.

LACK OF ICE AT CREAMERIES

One Concern Turned Back to Farmers \$2,700 Worth of Food Products—Many Other Losses.

(From the United States Department of Agriculture.)

One large creamery, which buys about 350,000 gallons of sweet milk and cream per year, returned to farmers last year nearly \$2,700 worth of these food products on account of lack of proper care which caused souring, churning and off flavors.

The records of another plant show that nearly 50,000 gallons of sour milk were received in one year.

Insufficient cooling caused most of these losses, which are duplicated many times all over the country during the heated season.

TREATING COWS FOR GARGET

Afflicted Animals Should Be Milked Regularly—Hands of Milker Should Be Washed.

Cows that are subject to garget should be milked regularly and clean. In some cases it may be advisable to milk oftener than twice a day. The hands of the milker should be washed after milking a cow that is affected with garget before milking another cow, to prevent carrying the germs. The practice of milking out an affected cow on the ground is a bad one for the germs are spread in this way to other cows.

Envelopes at the Courier Office.

THE MOST DANGEROUS OF ALL DISEASES

No organs of the human body are so important to health and long life as the kidneys. When they slow up and commence to lag in their duties, look out! Danger is in sight.

Find out what the trouble is—without delay. Whenever you feel nervous, weak, dizzy, suffer from sleeplessness, or have pains in the back, wake up at once. Your kidneys need help. These are signs to warn you that your kidneys are not performing their functions properly. They are only half doing their work and are allowing impurities to accumulate and be converted into uric acid and other poisons, which are causing you distress and will destroy you unless they are driven from your system.

DAIRY

DON'T FEED ROUGHAGE ALONE

Leguminous Hays, Such as Alfalfa, Clover, Soy Bean or Cowpea Hay Are Favored.

(Prepared by the United States Department of Agriculture.)

The best kind of dry roughage to be fed to the dairy cow, in connection with corn silage or roots, are leguminous hays, such as alfalfa, red, crimson, or alsike clover and soy bean or cowpea hay. While corn silage is an excellent feed, it is not a balanced one, as it does not contain sufficient protein and mineral matter to meet fully the requirements of the cow. The leguminous hays, in addition to being very palatable, have a tendency to correct this deficiency. They are also one of the best and cheapest sources of protein. One or more of these hays can be grown on any farm, and in addition to their value for feeding purposes, they improve the soil in which they are grown. Hay from Canada field peas, sown with oats to prevent the peas from lodging, also makes an excellent roughage.

Corn stover, coarse hay, etc., also find a good market through the dairy cow. This class of roughage is low in protein, however, and when it is used the grain must be richer in protein.

No positive rule can be laid down as to the quantity of dry roughage that should be fed, but about 6 to 12 pounds a day for each cow, in addition to silage, will be found to be satisfactory in most cases. When the dry roughage is of poor quality, such as coarse, weedy hay or a poor grade of cornstalks, a large portion can often be given to advantage, allowing the cow to pick out the best and using the rejected part for bedding. With this quantity of dry roughage the cow will take, according to her size, from 25 to 50 pounds of silage. This may be considered as a guide for feeding to apply when the roughage is grown on the farm. When everything has to be purchased, it is often more economical to limit the quantity of roughage fed and increase the grain ration.

While a cow's stomach is large and her whole digestive system is especially designed to utilize coarse feeds, there is a limit to the bulk that she can take. This limit is below the quantity of roughage that it would require to

A Well-Bred Cow.

furnish the nutrients she must have for maximum production; that is, a ration may contain the proper proportions of protein and carbohydrates and still be so bulky that she cannot handle it. She therefore should have some grain even though the roughage in itself is a balanced ration.

Each Seeks His Kind.

Thrust an Emerson into any Concord, and his pungent presence will penetrate the entire region. Soon all who come within the radius of his life respond to his presence as flowers and trees respond with boughs, brilliant and fragrant, to the sunshine. After a little, each Emerson stands girt about with Hawthornes, Whittiers, Holmeses and Lowells.—Newell Dwight Hillis.

Diamond SQUEEGEE TREAD Tires

When Your Tires "Cash in" Your Checks

Just as certainly as you buy a tire, you know that some day it will "cash in its checks"—and yours! That day you'll measure its mileage against the sum you paid for it. Not until then, probably, will you know whether that brand of tires really gives you your money's worth—

Unless those tires be Diamonds. You can count on Diamonds to roll up 5,000, 6,000 and 8,000 miles persistently—though they COST LESS than most other tires.

For example, in winter driving with chains, 341 Diamonds averaged over 5,000 miles on Quaker Cab Co. taxis in Philadelphia. The Texas Co. with over 500 cars, averages between 6,000 and 8,000 miles with Diamonds.

Why not cut your tire upkeep with a Diamond?

Grants Pass Hardware Co.

I BUY AND SELL
