## Daily Health Talk

### URIC ACID IN THE SYSTEM

BY LEE H. SMITH, M. D.

Uric acid is now generally recognized as the cause of more diseases than was heretofore believed. When the kidneys are out of order uric acid accumulates within the body in super abundance. The disordered kidneys do not filter the poisons out of the blood, as they ought to do, and so the poisons remain in the blood and float around until they find a place to lodge, in form of urate salts. The thing to remember is that you may have rheumatism in any part of the body—you may have pains anywhere—your back may ache and your head may be dizzy—but the trouble is not where the pain appears. The trouble is in the kidneys, and what is the first thing to do? You must get that excess uric acid out of your system, which can be done by taking Anurio Tablets, the splendid remedy which Dr. Pierce, of Buffalo, N. Y., has put on sale in the drug stores at a low price. Anurio Tablets (made double strength), when taken into the system as medicine, have the peculiar power of dissolving the uric acid deposited there. Drop a bit of sugar or salt into hot water, and it will disappear. In precisely the same way do these Anurio Tablets dissolve uric acid. Of course, after ridding the system of uric acid, it may return again unless you eat the right foods and live the right kind of life, but Dr. Pierce will advise you fully on proper food and correct living if you write and ask him. He makes no charge for such advice. Take Anurio Tablets to-day, by all means, and get that uric acid out of your system. Don't, don't, don't, put the matter off.

## THIS CAT EXPERT ANGLER

English Writer Tells of Feline That Catches Fine Trout Without Bait or Line.

Cats have a passion for fish and will hover about a room plaintively meowing long after the piscine substance has gone and only the smell is left; but it is not generally known that they are expert anglers, says a writer in the Family Journal (London). A Hampshire sportsman whose garden bordered on a well-stocked stream stated that his cat takes more trout out of it than he does. All fish love to bask in the sun and, taking advantage of this on fine summer days, Mr. Tom lies in ambush, concealed in the reedy grass bordering some bright pebbly shallow. He needs neither rod nor line; unlimited patience is his whole stock in trade. Not a move does he make, his quivering tail merely rustling the slender reeds as if stirred with the gentlest southern breeze. Presently there is a splash and a flounder, and a fine, fat trout, bursting with condition, comes flapping up to the shallow for its morning sun bath. For an instant only it lies there contentedly gasping in the soft, warm air, but in that instant the four-footed angler has made his spring and fastened his claws firmly in the fish's shimmering back.

## HOW ANY GIRL CAN HAVE PRETTY EYES

No girl or woman is pretty if her eyes are red, strained or have dark rings. Simple witchhazel, camphor, hydrastis, etc., as mixed in Lavoptik eye wash, will brighten the eyes and a week's use will surprise you with its QUICK results. Regular use of Lavoptik keeps the eyes healthy, sparkling and vivacious. The quick change will please you. Dainty aluminum eye cup FREE. National Drug Store.

## USE OF PHONETIC SPELLING

Reasons Advanced Why it Would Be Well if its Study Should Be Made More General.

Phonetics in its broadest sense is a study of the whole range of sounds, articulate, musical and otherwise. In its restricted sense it is confined to articulate sounds of human speech. Even in this restricted sense it is still broad enough to include the subject of the acoustic or mechanical side and the anthropological or philological side. It may discuss simply the speech vibrations that cause any particular sensations on the human ears, or it may include an investigation of the manner and causes of the changes the articulate sounds of a language undergo as it develops. The study of phonetics is widely advocated by philologists and by many of the most thoughtful teachers for three reasons: (1) That persons may speak their mother tongue correctly through thus learning to know the proper valuation of its sounds; (2) that they may learn successfully the pronunciation of other languages, to which a knowledge of their own is the best introduction; (3) that those who wish to study philology may have a key to that science. And the sounds of our language cannot be successfully studied or explained without some use of phonetic spelling. Hundreds of phonetic alphabets have been proposed, but the only one that has made progress and bids fair to become general (naturally with some modifications) is that of the Association Internationale Phonétique. This alphabet took form between 1885 and 1889 in proposals made by Paul Edouard Passy, a noted French phonetician.

## Boston's Famous Church.

There were only 3,000 houses in Boston when the North church was built and many members of the congregation came from outlying districts. The corner stone was laid in April, 1723, and the first meeting was held in December of the same year.

## Diamond SQUEEGEE TREAD Tires

### Mark those 3 Continuous Bars on the Tread

How quickly a railroad coach would pound to pieces if it had to jump three inches from one rail to the next. Skips or gaps in the rolling surface of tires are equally disastrous.

Those three continuous ribs on the Diamond Squeegie Tread give a smooth rolling surface as though it was a smooth tread tire. "More - Mileage Ribs" we call them, for they put more rubber right where the wear comes.

Yet that scientifically designed Diamond Squeegie Tread halts forward and side skids. It adds mileage—you'll run a Diamond thousands of miles before you wear down those Squeegie Ribs. Cut your tire upkeep with a Diamond.
