## Get the Big Price for Your Hay

The quality of your hay determines the price. There is often a difference of from \$6.00 to \$10.00 per ton between choice hay and hay that grades No. 3. Increase your hay land profits by air-curing your hay.

Air-cured hay is better hay. It holds its color. The leaves do not become brittle. There is little loss in handling. The hay keeps better in the mow, stack or bale, and is more palatable, more digestible and has greater feeding value.

Whether you sell your hay or feed it, your profits are increased when you adopt this system of making hay.

It does not cost you anything extra to air-cure hay. You merely use a Dain System Rake.

The Dain System Rake is the best for this purpose. It is the easiest to operate and you can handle the heaviest hay because, with the inclined frame, the capacity is the greatest where the quantity of hay handled is largest.

Drop in and look over the Dain System Rakes we have in stock.
