# POULTRY FACTS

## KEEP ONLY PROFITABLE HENS

Emergency Agents Waging Successful Campaign Against Unprofitable Fowls in Flocks.

(Prepared by the United States Department of Agriculture.)

Practically all the Southern Mississippi valley and middle Western states have effected satisfactory increases in their production of poultry products. The emergency agents are now waging a successful campaign against the unprofitable hens by getting owners to cull such fowls from their flocks. Hens which produce less than 75 eggs a year are better dead than alive, while fowls which yield from 75 to 100 eggs annually are only fair producers. Good layers produce 125 eggs and upward every 12 months. In some flocks of 200 hens, 75 of the low-producing fowls have

been eliminated and still the normal production has been maintained. This results from more favorable conditions and surroundings for the hens left in the flock which are not so crowded and which consequently produce better.

## POULTRY AND EGGS SUPPLY

Badly Needed to Help Feed the World—Nothing Else Costs So Little to Raise on Farm.

(By P. G. HOLDEN.)  
The high price of feed and the high price of poultry have combined in causing farmers to greatly reduce their flocks, and as a result we are facing a serious shortage in poultry and eggs at a time when they are badly needed to help feed the world.

We must not forget that while feed is high and while poultry brings good prices, nothing else costs so little to raise on a farm as chickens, and that eggs are bringing such high prices we cannot afford to shut off the source of their supply.

Large flocks of poultry are needed on every farm, and every farmer should keep his young pullets, which will soon be his best layers. Get rid of the roosters. Avoid wasteful methods in handling poultry and in marketing eggs.

## BLACKHEAD IS BAD DISEASE

Cases Are Infrequent Where Birds Are Permitted to Forage for Most of Their Feed.

Of the infectious diseases of turkeys, according to Andrew S. Weiant, of the bureau of animal industry, department of agriculture, blackhead is the most destructive. It is notable that whenever the climate and range conditions are such as to permit of

the turkeys foraging for most of their feed from the time they are hatched until they are marketed, cases of blackhead are infrequent. Blackhead occasionally affects grown turkeys, but it mostly occurs among young turkeys between the ages of six weeks and four months. No positive cure for blackhead has been found. As in the case of all other infectious diseases, the sick bird should immediately be removed from the flock to prevent a further spread of the disease, and if very sick, it is best to kill it and burn the body.

You can't cover blackheads, pimples, red spots on the face with powder: they're bound to be seen—don't worry or spoil your temper, take Hollister's Rocky Mountain Tea each week—it will banish them thru the blood, the only sure way. 35c. Sabin's Drug Store.—Adv.

## Why Suffer So?

Why suffer from a bad back, from sharp, shooting twinges, headaches, dizziness and distressing urinary ills? Grants Pass people recommend Doan's Kidney Pills. Could you ask for stronger proof of merit?  
Mrs. A. M. Evensen, 625 S. Fourth St., says: "I was nearly laid up with rheumatic troubles, which affected my hips and one of my limbs. At times the pain was almost unbearable. Often the muscles and cords in my limbs seemed to contract, causing intense pain. During this trouble, my kidneys were more or less affected, which prompted me to take Doan's Kidney Pills. The first box regulated my kidneys and I took about three boxes in all when the rheumatic pains in my hips and limb left me entirely. Now when my kidneys bother me, I use Doan's Kidney Pills and they always do me good."  
Price 60c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Evensen had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.
