Making Two Ears of Corn Grow Where Only One Grew Before

Not getting the right amount of rain at the right time, is one of the principal causes of crop failure.

This is past history, however, on thousands of profitable farms throughout the country. These farms use Electric Power, and motor driven pumps allow irrigation in the right amount and at the right time.

There are suitable G-E Motors for running the machines in the Barn, in the Dairy, and in the Field. Almost every task and chore on a farm can be done more rapidly, more economically and more safely with Electric Power, than in any other way.

Our Power is at your command at any time, day or night, throughout the year.
