214 North Sixth Street

Grants Pass Service Station

"Through Service We Grow"

Water Regulated by Pedal. Pressing one end of a pedal with the foot admits cold water to a new washstand, pressing the other end allows hot water to flow and pressing the entire pedal mixes the two so that moderately warm water is obtained.

Quartz blanks at Courier office.

How We Go At It

First we look into the battery to see if you put water in it.

Then we use the hydrometer which is the one reliable way of knowing the condition of its charge.

Then, if no special cause of trouble appears we put it on the line to see if it will take a charge.

But if there is plain indication of serious trouble we open the battery up and find out exactly what's what.

Don't trust your battery to amateurs or artists in guesswork, who claim they can tell inside condition by outside inspection.

Come here where you find adequate machines and apparatus to really inspect, charge and repair any battery.
