Britons Build Biggest Plane.

The Tarrant Aircraft Construction company of Farnborough, England, has just finished building the biggest airplane in the world. It is a triplane, the middle plane of which is 131 feet wide. Above and below this are two planes, each 98 feet long. All these planes are 15 feet 2 inches deep. The body is 76 feet long (20 feet longer than the biggest biplane), and the height is 37 feet. The pilot's seat juts out 12 feet beyond the line of the planes. The body of the machine resembles a whale in length and girth, with a great blunt-ended nose. Between the planes are six Napier-Lion engines, each developing 500-horsepower. Four of them operate two-bladed tractor propellers; two of them four-bladed "pusher" propellers.

Jap Industry Hard Hit.

During the war the Japanese zinc industry was very prosperous and large profits were made on ore which was imported from Australia and the French Indies. The signing of the armistice, however, has dealt a hard blow to this industry, and it is reported that it costs \$200 a ton to produce Japanese zinc, while the market price is only \$187 a ton. It is expected that this will result in a request for subsidies and import protection, since the deposits of Japanese ore are of such inferior quality that competition with imported ore cannot be met successfully.

PRINTERS MAY HAVE TO LEARN NEW TRADE

New York, Oct. 14.—Elimination of typesetting, one of the costliest operations of magazine production, by the use of plates made by photographing the original typewritten copy, has been accomplished in the October 18 issue of the Literary Digest, consisting of 80 pages.

This radical innovation, which was brought about by the printers' strike in this city, leads the publishers to suggest that "it is possible in this age of marvels that the whole future of magazine production may be revolutionized by the elimination of typesetting."

The make-up of the magazine is in no way changed, the only difference being that the style of the type is that used on typewriters and is uniform in all the reading matter throughout the number. The right-hand side of each column is irregular as in ordinary typewritten copy.

CHAPLIN WILL DO "HIGH BROW" DANCE AT OREGON

Charlie Chaplin "expresses himself" in the new aesthetic dances, which are quite the thing in the most artistic circles, in "Sunnyside," his third million dollar picture, released by First National, which will be shown at the Oregon Theatre Wednesday and Thursday. The manner in which Charlie gets in with a group of beautiful and scantily draped young girls which are engaged in this sort of dance is quite Chaplinesque.

Such a thing as riding a cow is almost never attempted in the country even by the boy and girl who take the cows out to pasture and bring them back at night. But Charlie attempts this when he tries to induce a cow to leave the church in which the boys have been breaking up the meeting.

Landing in a ditch on his head, the little comedian goes into a state of coma wherein he "sees things." While these are imaginary to him, on the screen they seem real enough, and the sight of Charlie burlesquing the serious sort of dance which St. Denis, and Hoffman, and other less famous give, surrounded by beautiful young girls, bare of limbs, furnishes a most entertaining combination.

After this little diversion Charlie settles down to his real problem in the picture, that of saving the love of his rural sweetheart from being stolen by a "city dude" who appears in the community with a fine automobile.

CLOTHING PROFITERS TO COME UNDER NEW LAW

Washington, Oct. 14.—Senate and house adopted the conference report on amendments extending the food control act to include clothing and food containers and providing punishment for profiteering and hoarding.

The bill now goes to the president, who asked for this legislation as a weapon against the high cost of living.

Big Private Telephone Exchange.

The size of the private telephone exchange grows with the erection of every hotel or office building of any considerable proportions. The largest ever constructed is that of a New York hotel which has been recently opened to the public. It occupies 3,165 square feet of floor space, having an operating room 110 feet long by 15 feet wide, a terminal room 30 feet long and 25 feet wide, a restroom 25 feet by 15 feet and a locker and wash-room 30 feet by 14 feet. The operating force consists of one chief operator, one assistant chief operator, eight supervisors and 110 attendants. The switchboard consists of twenty-three positions. Thirteen positions are equipped with telautographs used for paging and announcing only. The switchboard has a capacity of 3,340 extensions and 180 trunks. The hotel has telephone service in each of its 2,200 rooms, and there are forty public telephone booths served by four switchboards connected with the main switchboard. The following gives some idea of a few of the items which make up part of the telephone system: 630 fuses, 1,170 condensers, 2,400 relays, 5,350 lamps, 85,500 jacks, 750,000 soldered connections, 7,920,000 feet of wire.

Lycurgus, the ancient Greek lawmaker, bound the citizens by oath not to change the laws until his return, and then left forever.

ROOSEVELT MEMORIAL FUND

To the Roosevelt Memorial Association, Thomas M. Stott, County Chairman, Grants Pass, Oregon.

I herewith subscribe the sum of _____ to the ROOSEVELT MEMORIAL FUND.

Name _____

Address _____

The above amount is inclosed herewith.

According to the plans of the Roosevelt Memorial Association, the Roosevelt Memorial Fund of \$2,000,000.00 is to be utilized to erect a National Monument in Washington, D. C.; to acquire and maintain a public park at Oyster Bay, N. Y., and ultimately to include Sagamore Hill, the Roosevelt home, therein, to be preserved like Mount Vernon and Lincoln's home at Springfield; and to endow a National Society to perpetuate the principles and ideals of Theodore Roosevelt.

Each contributor to the fund will receive a certificate of membership in the Roosevelt Memorial Association. A certificate will also be presented to every school contributing to the fund.

The name of every contributor will be placed on the list of names deposited in the National Monument to be erected at Washington, D. C.

AROUND THE WORLD WITH THE AMERICAN RED CROSS. Junior Red Cross.

Early in the participation of the United States in the world war, the American Red Cross perceived the value of mobilizing the school children of the country and the Junior Red Cross was organized. Before the war ended nine million children were enrolled and helped in the war fund and membership campaigns, in chapter production of relief supplies and manufacturing furniture for the refugees whose homes and household goods were destroyed.

Children everywhere in the United States responded to the call to service sounded by President Wilson as head of the American Red Cross. This photograph is that of an enthusiastic young Japanese member of the Junior Red Cross of Spokane, Wash., starting out on the ambitious undertaking of collecting "a mile of pennies" for war relief. A comprehensive peace program is now being worked out for the Junior Red Cross, which is being held intact.

Southern Arizona and Southern California are the only parts of the United States where date trees have been grown at commercial benefit.

Beware of the Flatterer. "Flattery," said Uncle Eben, "is generally a scheme for easy money makin', without even goin' to de trouble of fixin' up a gold brick or a satchel of green goods."

Keep Doorknobs Tight. Doorknob screws often work out and let the knob come off. This may be prevented by removing loose screws, covering them with gine and screwing them back into place.

Potash in Bracken. It is believed that the ash of bracken contains 40 to 50 per cent of soluble potash. The potassium occurs chiefly as sulphate and chloride.
