Nature's Way
A correct and positive answer to your question of how to easily, economically, comfortably and healthfully heat your home this Winter:—
RADIO
PEERLESS HEAT
"Nature's Way"
No more chilly, drafty or poorly ventilated homes—no more furnace difficulties—no more big fuel bills—no more high costs for installing heating systems—no more long, inefficient pipes to install and heat before the house is heated—no more registers to be bothered with—no more opposition to Nature's laws. The RADIO Engineers have adapted Nature's way in producing the RADIO Furnace.
Made in the West to Fit Western Conditions
For example: Adapted, when desired, for just enough heat, with a small fire, to make comfortable the chilly mornings and evenings in this climate.
Like all these things, it is extremely simple. Note, for a moment—in the illustrated folder that we will send you free upon request—how Nature works, and you will see at a glance how the world has so long been violating the laws of Nature by trying to force heat in all directions through long, expensive pipes.
It heats the entire house with only one register and WITHOUT PIPES, on the basis of Nature's law that cold air travels downward and hot air upward. By harnessing this principle "RADIO" Engineers not only adapted Nature's way to heat but Nature's way for providing humidity, circulation and ventilation. Thus, you are assured of a cool basement, warm floors and automatic control—without inconvenience.
Easily and quickly installed, before or after building
At an Actual Saving in Fuel of From 25 to 50 per cent
Adapted especially for wood; burns coal or briquets equally well. Call, phone or write for the free illustrated folder entitled, "More Heat for Less Money," or call and see furnace demonstrated.
