ple to decide on the fate of education in the state, he added.

Physical instruction is necessary to the students, in order to be able to stand the test to which they are put later, said President Campbell. He told his listeners what Oregon schools are doing in the way of physical instruction and urged the people here to provide some means for the building up of the students here. Sam Baker, in introducing the speaker, spoke on the necessity of a gymnasium for the schools here. He also urged the people of the county to vote for the erection of the building at the coming special election on May 1st.

The high school chorus gave several selections that gave evidence of much ability and good training.

FEDERAL DOUBLE CABLE BASE TIRES

They Give More Miles

FEDERALS are not only better equipped to stand punishment from the road but also from the rim.

The exclusive Double-Cable-Base feature frees Federal Tires from internal rim troubles.

Four twisted steel cables hold Federal Tires firmly on the rim; keep them from shifting, rocking, blowing off or the toe bead pinching the tube.

This prevents rim cuts and blow outs just above the rim. Thousands of Federal users are proving this every day.

Federals could be economizing for you, but not unless you have them on your car. Let us tell you more about Federal Tires and why they save money.
