### OPINIONS DIFFER ON CHINA-JAPAN PACT

Tokio, May 1.—A dispatch from Mukden to the Nichi Nichi says there exists divergent opinions as to the abolition of the China-Japan military agreement, while the Chinese government seems to attach little importance to it.

General Chang Tso-lin Tuchun expressed to Lieutenant General Nara the desire that military cooperation with Japan be continued, the newspaper states, to meet the menace to the Chinese boundary by the bolshevik. On the part of Japan not a little importance is attached to cooperation with China at least so long as Japanese troops are in Siberia. It is expected that a diplomatic Japanese official will be sent shortly to Peking to consult with the government there regarding this agreement.

### ELECTRICITY WILL PRODUCE FINE "JAG"

San Francisco, May 1.—Possibility of producing all the symptoms of alcoholic intoxication on electric "juice" attracted a good deal of interest here recently when Dr. Elbert Abrams of San Francisco demonstrated to medical men the use of an electrical device he has invented.

The "electric jag" discovery was purely incidental, Dr. Abrams said. "The discovery," he said, "is based on the theory that the unit of energy is the electron and that every material thing is simply a manifestation of different rates of vibration. I have used the vibrations of chloroform to produce the effects of chloroform itself."

The feet of the subject are placed on a sheet of zinc, an electrode is placed upon the head, and, when the current is turned on, one newspaper writer said: "John Barleycorn is with you again. The 'kick' comes slowly and without any appreciation of the fact on the part of the subject until he finds himself unduly loquacious, happy or sleepy."

# FEDERAL

## DOUBLE CABLE BASE TIRES

They Give More Miles

FEDERALS are not only better equipped to stand punishment from the road but also from the rim.

The exclusive Double-Cable-Base feature frees Federal Tires from internal rim troubles.

Four twisted steel cables hold Federal Tires firmly on the rim; keep them from shifting, rocking, blowing off or the toe bead pinching the tube.

This prevents rim cuts and blow outs just above the rim.

Thousands of Federal users are proving this every day.

Federals could be economizing for you, but not unless you have them on your car. Let us tell you more about Federal Tires and why they save money.
