Special Steels add Life to the

MAXWELL

These steels are the product of the highly developed Maxwell laboratories, where steels have been studied, analyzed and tested for years. They are made to Maxwell's own formulae and enable the Maxwell to stand punishment that few cars can meet successfully. They lessen the task of the engine and make it more responsive, quicker in action and a delight to handle.

These are some of the virtues which have won friends for the Maxwell in ever increasing numbers and give it a longer life than many cars of higher price. Today there are approximately 400,000 Maxwell's on the world's highways. The year 1920 will add 100,000 more.
