FARM ANIMALS

POINTERS FOR BEEF GROWERS

One Method of Bringing Down Prices of Meat is Improvement in Type of Animals.

General improvement in the type and quality of beef animals the country over is one of the means urged by the United States Department of Agriculture for bringing down the high cost of meat to the consumer and, at the same time, increasing the profit of the producer. Some of the most es-

The Demand for Improved Stock is Steadily Increasing.

ential items in growing beef on the farm, specialists of the department say are:

Plenty of pasture and feed. The right kind of cows—those that will produce good calves regularly. A good pure bred registered bull—one that will sire good calves persistently. A large calf crop. This means that all cows shall drop calves, and that the calves shall be properly cared for at birth.

Proper care of the breeding herd and the calves.

Selection of good heifer calves to replace old or inferior cows.

Prevention of disease among the breeding herd and the younger stock.

Shelter sufficient to protect the cattle from both severe cold and extremely hot weather.

A practical knowledge of fattening cattle for market.

Marketing to advantage.

There is a farmers' bulletin, No. 1078, on growing beef on the farm that may be had free on application to the Division of Publication, United States Department of Agriculture.

HOGGING DOWN RYE UNWISE

Practice is Unprofitable, According to Pork Production Tests at the Ohio Station.

Hogging down rye is an unprofitable practice, according to tests made in pork production at the Ohio experiment station. The tests show that it is generally more profitable to harvest the grain and sell it as a cash crop or to feed the grain to hogs after thrashing rather than to allow the hogs to harvest the grain themselves.

Specialists point out that the daily increase per pig when hogging down rye is generally less than half a pound and that the amount of grain required to produce 100 pounds of gain is much higher than where the grain is fed directly to the hogs. As a rule, about 611 pounds of rye, hogged down, were required to produce 100 pounds of gain, whereas hogs fed on corn with tankage and clover pasture required but 331 pounds of concentrates to produce the same amount of gain.

The unprofitableness of hogging down rye is attributed to the fact that hogs are either unable to secure rye in sufficient quantities or are inclined to eat only slightly more than is required for maintenance.

Camel CIGARETTES

Camels are sold everywhere in scientifically sealed packages of 20 cigarettes for 20 cents; or ten packages (200 cigarettes) in a glassine-paper-covered carton. We strongly recommend this carton for the home or office supply or when you travel. R. J. REYNOLDS TOBACCO CO. Winston-Salem, N. C.

It's pins to piano?

Will you say that Camels are the most delightful cigarette you ever smoked!

YOU get to enjoy Camels so much and you so keenly appreciate their new and refreshing flavor and their smooth mellow-mild-body—well, you realize they're made to fit your taste!

You can start with *Camels* quality as one reason for their goodness. Then, to quality add Camels expert blend of choice Turkish and choice Domestic tobaccos which you will quickly and surely prefer to either kind smoked straight! All that gives you the most delightful cigarette any smoker ever put a match to!

Camels never tire your taste, no matter how liberally you smoke. And, *Camels* are free from any unpleasant cigaretty aftertaste or unpleasant cigaretty odor!

Compare Camels with any cigarette at any price!

Millions for a New Stomach

One of the greatest American millionaires said to his physician, "A million dollars, Doctor, spot cash and no gambling, for a new stomach," and then the sick man groaned and turned away. All his wealth could not make him happy or contented, for happiness largely depends upon digestion. Without health where does happiness come in? After all the stomach plays a great part in everyday life. Without a healthy stomach and good digestion our blood is thin, watery and poor, our heart action is weak, our liver does not do its duty, and man is miserable and unhappy. Prevent disease by putting the house in order and strengthening the system against the germs of disease.

Dr. Pierce, of the Invalids' Hotel and Surgical Institute, at Buffalo, N. Y., years ago understood diseases and their prevention, and he discovered certain roots and herbs which were nature's remedies, and succeeded in putting them up in a form that could be easily procured at the drug store (liquid or tablets). This he called Dr. Pierce's Golden Medical Discovery. This Discovery gives no false stimulation because it contains no alcohol or any narcotic. It helps digestion and the assimilation of such elements in the food as are required for the blood. It gives to the blood the food elements the tissues require. For over fifty years it has enjoyed the confidence of the American public. Try it now!

Every drop power-full

"Red Crown" is all-refinery gasoline—with full power in every drop. It is made to meet the requirements of your engine.

"Red Crown" has the full and continuous chain of boiling points necessary for ready starting, quick and smooth acceleration, steady dependable power and long mileage. Look for the "Red Crown" sign before you fill.

The Gasoline of Quality

C. D. Fies, Special Agent Standard Oil Co., Grants Pass

LIVE STOCK NOTES

Hogging down corn pays.

Mud wallows are unsanitary and breed disease.

There is a tendency to feed too much roughage to horses.

Oats, especially for little pigs, should be ground and hulls sifted out.

The early lamb gets a larger supply of milk from the ewe than the late lamb does.

Water should be kept in the lots all the time. Never force hogs to drink from a stagnant pool.

Judge a sow by the size and vitality of her litter, as well as by her conformity to the breed type.

Young pigs cannot learn to eat too soon. They should be encouraged to eat when as young as three weeks of age.

A variety of crops are available for pig pasture, including the alfalfa, red clover, timothy, Canada field peas mixed, corn, oats and barley. Winter or hairy vetch is a valuable crop.
