Rivers That Are Salty.

There is a salt river in Australia, and another, the Rio Salado, in the Argentine Republic in South America. The Athabasca river of British North America has two important salt branches, one of which rises in a natural salt spring and the other has its source in the Cariboo mountains, which contain vast deposits of salt rock. Another salt river, having its origin in a similar formation, is one of the tributaries of the Great Slave river.

First Woman Judge in the South

Mrs. T. J. Kelley, the first woman to become a court judge in the south, being sworn in as judge of the juvenile court in Memphis, Tenn. She has been active in civic and welfare work for many years and her election was a recognition of her efforts and success.

GATHERED FACTS

The lace trade affords employment to something like 200,000 persons in France.

The National Council of Danish Women comprises thirty-five associations, with a membership of about 40,000.

Tokyo has about 45,000 telephones and 60,000 persons are said to be seeking the service.

Out of 836 professions and trades followed in the Netherlands, nearly half are practiced by women.

The yearly importation of pearls to London is valued at \$5,000,000. Most of them come from Bombay.

FARM POULTRY

TESTING EGGS FOR HATCHING

Satisfactory Candler May Be Made With Shoe Box Large Enough to Cover Lamp.

(Prepared by the United States Department of Agriculture.)

An egg, whether impregnated or not, has a small grayish spot on the surface of the yolk known as the germinal spot. As soon as a fertile egg is placed under a hen or in an incubator development begins. All eggs should be tested at least twice during the period of incubation, preferably on the seventh and fourteenth days, and the infertile eggs and dead germs removed. White eggs can be tested on the fourth or fifth day, while the development in eggs having brown shells often can not be seen by the use of an ordinary egg tester until the seventh day. Dead germs soon decay and give off a bad odor if allowed to remain under the hen. Infertile eggs make good feed for young chickens and are often used in the home for culinary purposes. Most incubator companies furnish testing chimneys with their machines, which will fit ordinary lamps. Electric or gas lamps may be used in a box

A CLEAR SKIN

Women do not have to patronize the beauty parlor—for if their skin is disfigured with pimples and blotches, and their blood is in disorder they should obtain at the drug store that wonderful blood tonic and alterative of Dr. Pierce's which he placed before the public over 50 years ago. Since that time many thousands of men and women have testified to its wonderful blood cleansing effect. This is what one woman says:

CHEHALIS, WASH.—"I have used Doctor Pierce's medicines for over forty years for myself and family and have always found them just as represented. I think Dr. Pierce's Golden Medical Discovery for a tonic and blood builder cannot be beat; and Dr. Pierce's Pleasant Pellets have no equal for constipation; in fact, I can heartily recommend any and all of Dr. Pierce's remedies. "My daughter had chronic constipation from babyhood and doctors could not cure her. Dr. Pierce's Pleasant Pellets is the only thing that ever helped her."—MRS. JENNIE K. SWOFFORD, 1320 Alfred St.

The California and Oregon Coast Railroad Company TIME CARD

Arrive Grants Pass.....4 P.M.
For information regarding freight and passenger rates call at the office of the company, Lundberg building, or telephone 131.

An Egg Tester Made From a Shoe Box and a Common Lamp.

hole the size of a silver dollar should be cut in the top of the box to allow the heat to escape.

The eggs are tested with the large end up, so that the size of the air cell may be seen as well as the condition of the embryo. The testing should take place in a dark room. The infertile egg, when held before the small hole, with the lamp lighted inside the box, will look perfectly clear, the same as a fresh one, while a fertile egg will show a small dark spot, known as the embryo, with a mass of little blood veins extending in all directions, if the embryo is living; if dead, and the egg has been incubated for at least 48 hours, the blood settles away from the embryo toward the edges of the yolk, forming in some cases an irregular circle of blood, known as a blood ring. Eggs vary in this respect, some showing only a streak of blood. All infertile eggs should be removed at the first test. The eggs containing strong, living embryos are dark and well filled up on the fourteenth day, and show a clear, sharp, distinct line of demarcation between the air cell and the growing embryo, while dead germs show only partial development, and lack this clear, distinct outline.

FLOORS IN POULTRY HOUSES

Must Be Kept Dry, as Dampness is Fatal to Both Young and Old Fowls—Also Keep Clean.

Poultry houses may be built with or without floors. In either case they should be dry, as damp floors make damp litters, and dampness is fatal to both fowls and chicks. If the house is on dry, sandy soil, a dirt floor is usually quite satisfactory, but as a rule it is more damp than board or cement floors, according to the United States department of agriculture. Dirt floors should be scraped and new soil put in two or three times a year to keep them sanitary. If board floors are used they should be both tight and smooth so far as to make them dry and easy to clean. If possible they should be eight or ten inches from the ground to allow a circulation of air and to prevent rats from harboring under them.

Maid Threw Diamond Earrings in Fire.

The maid in clearing the table at the home of Mrs. Patrick Martin at Goshen, N. Y., brushed up a pair of diamond earrings, valued at \$600, with the crumbs and threw them into the kitchen stove.

DUCKLINGS THRIVE ON MASH

Mixture of Cornmeal, Ground Peas, Bran and Middlings is Fine for Young Fowls.

Growing ducklings thrive best on a feed composed of equal parts by measure of cornmeal, ground peas, bran and middlings, all made into a thick mash either with scalding hot water or milk. The mash is improved by adding short-cut green grass, clover or some other green stuff, and a few handfuls of coarse sand.

Limerick's Claims to Fame.

Limerick has been linked up with other things besides verses and medieval conquest. Limerick laces were at one time renowned, until they were so widely copied that their originality was lost. Today Limerick is famous chiefly for bacon and pretty girls. The natives claim the very prettiest Irish girls grow up in Limerick. As for the bacon, 350,000 pigs are killed in the town yearly, and yet pigs swarm in its streets, yards and houses. Limerick bacon and ham seldom reach the American table, but throughout the British Isles they are regarded as the best in the world.
