LEE Tires

"SMILE AT MILES"

GLUTTONS FOR PUNISHMENT

Lee Tires ask no favors of the road.

On rough country roads their tough treads travel almost unharmed over sharp and jutting points that would tear the heart out of less sturdy tires. On paved streets and boulevards Lee Tires wear down surprisingly and pleasingly slow.

If you knew how to make tires and none but the best would satisfy you, the Lee Tire is the kind you'd build.

So thoroughly good are Lee Tires that you'll get an entirely new idea of tire mileage and satisfaction from the first one you try. Let us show you why.

Paper Manufactured From Wood.
The chief raw materials from which paper is made are spruce, hemlock, poplar and pine woods, rags, straw and old paper. Three-fourths of the entire output is manufactured from wood pulp.

"Sport Not Worth the Candle."
"It's a poor sport that is not worth the candle" is from George Herbert's "Jacula Prudentum," a collection of proverbs dated 1531, which had appeared in a shorter form as "Outlandish Proverbs" in 1540.

Manymore Hag's Waned.
First Neighbor—"Well, the party wady's homestead is about over." Second Neighbor—"I saw him kiss her this morning with his hat on his head, his hand on the doorknob and his eye on the clock."—Pitt Panther.

Indians Still Use Blow Gun.
The blow gun is still popular for hunting birds among the Kossati Indians in Louisiana. This weapon consists of a tube, usually of cane, about six feet long, rubbed smooth on the inside with an implement made for the purpose and carefully straightened with the aid of fire. Slender pointed darts about eight inches long are used as ammunition, each one wrapped neatly along a third of its length with chistledown or cotton to make it fit the inside of the tube. The hunter places a dart in the tube, which he raises to his lips and with which he takes careful aim at his game; then with a quick puff of breath he drives the little dart flying with a sufficient force to impale and kill a small bird or squirrel.

Chinese Barbers.
The Chinese are not accustomed to tipping the barber. As a matter of fact the Chinese barber is very modest in his prices, and his patrons can obtain a hair cut, a head shave, a face shave, and in addition have his shoulders and back massaged, all for a sum total of less than 5 cents. The straight razor used by Chinese barbers is a triangular shaped blade with straight handle, folding up as does the American straight razor. The blades are made from old nails or any other crude steel which has outlived its usefulness in other directions.

Original Pins.
Until the middle of the sixteenth century the poorer class in England used rude skewers of wood as pins, while the more fortunate had pins made of gold, silver and brass.
