FARM STOCK

KEEPING SHEEP FOR MUTTON

There Are Many Areas Where Animals Could Be Kept to Advantage for Meat and Wool.

Sheep are not very generally kept on farms for supplying the home family with meat. There are many areas, especially in hilly or mountainous regions, where nearly every farm could keep a few mutton-sheep to advantage. Boys' and girls' clubs in some parts of the country have done much to foster home production of mutton. Sheep naturally graze over rather wide areas and seek variety of plants.

Sheep Are Useful in Pasturing. Off Weeds in Standing Corn After Cultivation Stops.

This habit particularly adapts them to being kept in large numbers on lands of sparse vegetation or furnishing a variety of grasses or other plants, says the United States department of agriculture. They do better on short and fine grasses than on coarse or high feed. They will eat a good deal of brush and, if confined to small areas, will do a fair job at cleaning up land. When used in this way, or on land producing brush only, they can not be expected to prove very satisfactory in the production of good lambs or good wool.

PROPER CARE OF YOUNG PIGS

First Thing to Be Done Is to Cut Off Four Sharp, Hard Tusks—Never Pull Them.

Soon after pigs are born, the four sharp, hard tusks, two in the upper and two in the lower jaws should be cut off. Take a pair of nippers and cut the teeth off, but not too near the gums. Often these tusks cut the sow's teats, make them sore and she will

BETTER DEAD

Life is a burden when the body is racked with pain. Everything worries and the victim becomes despondent and downhearted. To bring back the sunshine take

It's a cinch to figure why Camels sell!

You should know why Camels are so unusual, so refreshing, so satisfying. First, quality—second, Camels expert blend of choice Turkish and choice Domestic tobaccos which you'll certainly prefer to either kind smoked straight!

Camels blend makes possible that wonderful mellow mildness—yet all the desirable body is there! And, Camels never tire your taste!

You'll appreciate Camels freedom from any unpleasant cigarette after-taste or unpleasant cigarette odor!

For your own satisfaction compare Camels puff by puff with any cigarette in the world at any price!

Camels are sold everywhere in scientifically sealed packages of 20 cigarettes for 20 cents; or ten packages (200 cigarettes) in a glassine paper covered carton. We strongly recommend this carton for the home or office supply or when you travel.

R. J. REYNOLDS TOBACCO CO., Winston-Salem, N. C.

not let the pigs suck. Then, also, the pigs cut themselves with those tusks, and sometimes stick them through their tongue, cannot suck, and starve. They cause sore mouth. They are soft and easily removed.

A pair of sharp scissors will cut them easily but under no circumstances should they be pulled out. If it is seen that a pig is getting too fat, it is evidence that it is robbing its mates. To prevent this, take a sharp knife and cut its rooter in two or three places, deep enough to make it sore, and it will stop taking more than its share.

OPPORTUNITIES FOR PROFITS

Only About 4 or 5 Per Cent of Live Stock Is Purebred and Demand Steadily Growing.

There are many opportunities for good profits in the breeding of purebred live stock. When it is considered that only about 4 or 5 per cent of all our stock is purebred and that the demand for better stock is steadily growing it must be clear that there is still room for capable men with a love for live stock to make breeding a profitable business. But the man who is not prepared either through training or inclination to devote a large part of his time to the care and management of his stock is surely making a mistake to engage in the purebred business.

LIVE STOCK NOTES

Self-feeders save time and labor in feeding swine.

The hog is the cheapest producer of animal fat.

No animal parasite is quite so persistent as the hog louse.

With the sow particularly good feeding and plenty of exercise are important.

If proper care is given the ewe previous to lambing many losses can be prevented.

In the selection of the brood sow it is essential that uniformity of size and quality be maintained.

Neorhabdiosis, known in pigs as scro mouth, bull nose and snuffles, is controlled by cleaning and disinfecting house and feeding places, and isolation of affected pigs.

True Liberty.

True liberty can exist only when justice is equally administered to all.—Lord Mansfield.
