FOR INFORMATION WRITE TO
THE REGISTRAR, Oregon Agricultural College, Corvallis, Ore.

Windmill Generates Electricity.

The windmill has not been generally found available for the generation of electricity because of the irregularity of the air currents, but this has been overcome by a Swedish inventor. Instead of being directly connected to the dynamo in the usual manner, the mill-wheel shaft is geared to a hoisting device, which serves to elevate a two-ton weight to the top of a 53-foot steel and wood tower. When the weight reaches the maximum height, it is released, and, as it falls, actuates the dynamo, which is mounted on a bracket at the apex of the tower with the mill wheel. A storage battery and switchboard are housed in the lower portion of the tower.

Just Like an Apple to Marjorie.

Little Marjorie, who is three, told her mother, the wife of a Muncie manufacturer, the other evening, that while the mother was uptown shopping she had been taken by a servant to call on her father in the latter's office.

"What time did you go?" asked the mother.

"Oh, in the core of the afternoon," replied the little girl.

"Mother doesn't understand what you mean by the 'core' of the afternoon." It was explained to Marjorie.

"Why, I mean the middle," she said simply, as wondering at the ignorance of grown folks.—Indianapolis News.

Courier for commercial printing.

New Mexico's Big Turtles.

Fossil turtles, some of them not less than three million and others seven million years old, have recently been found in San Juan county, northern New Mexico. Remains of extinct turtles are rather common, but most of them consist of many small pieces, badly crushed and flattened or otherwise damaged. The remarkable feature of many of those lately discovered in New Mexico is that the bony box-like shell is almost as perfect as when it was occupied by the body of the living animal during the tertiary and cretaceous periods. No less than 50 specimens were perfect enough to be identified and described by specialists of the United States geological survey. Sixteen of them are new to science and have therefore been given new names.

Prison.

To dream of living in a prison contrarily promises consolation for trouble. To visit one in your dream is a sign of a legacy from some distant rich relative. To dream of departing from a prison is a sign of great coming happiness. To dream of entering one signifies safety in some accident.—Encounter.
