SEES GOOD IN THE TEA CUP

Doctor Elliot, Aged Educator, Goes on Record as Having Faith in That Moderate Stimulant.

Dr. Charles W. Elliot, now in his eighty-sixth year, confesses to a deviation from the strict rule of abstinence which cannot but cause concern in the inner circles of moral reform, says the New York World. Though he has always indulged in "stimulants like tea, coffee and alcohol," and in tobacco not at all for more than half a century, he yet finds a certain virtue in tea drinking. "I have used tea most," he says, "because it seems to me to facilitate the mental effort of writing and speaking."

If the venerable ex-president of Harvard university had merely said that he derived some dietetic benefit from tea, no exception would be taken to the statement. It is his frank admission that he uses tea as a stimulant and finds that it helps his mental processes which will be challenged.

Can there be good in any stimulant? Can the willful excitation of the mind by any kind of brew be other than immoral in its essential nature? All Simon-pure reformers of the drink evil will feel sure that the use of tea has drugged Doctor Elliot's intellect and robbed it of its highest productivity. But what the world has lost in that particular will count as nothing to the self-revelation that this distinguished champion of temperance is not 100 per cent perfect in his prohibition views.

NEW ROUTES OF NEAR EAST

Railroad Lines Will Be Materially Extended as the Result of Operations of the Great War.

The military operations of the war gave a material boost to railroad development in the near East, says Lewis Heck, in Asia. After their successful campaign at the end of 1917, the British extended their track line from Egypt to Palestine, connecting at Ramleh near Jerusalem. The line then went on to Haifa, which the British are planning to make their great port in the East and the principal terminus on the Mediterranean for a new short-line railroad to Bagdad and India, connecting Egypt and the African possessions with India. The war gave the Bagdad railway extensions in Cilicia, northern Syria and Mesopotamia—British prisoners of war furnishing much of the labor. The tunnels through the Taurus mountains were completed. Trains now run from Constantinople through Aleppo to Nisbin. At the eastern terminus of the line—Bagdad—trains run northward as far as Tekrit. Between Nisbin and Tekrit is an unfinished section of a few hundred miles. Before the war, trains did not run at night on this line, but this was changed by stern necessity. When normal traffic conditions are re-established, the journey from Constantinople to Bagdad and on to the Persian Gulf can be made in a few days.

Shakespeare Farm to Be Sold.

Among the numerous landed properties which are coming into market during the next few months is one of more than ordinary interest, namely, the Greedon Underwood estate, Buckinghamshire, says the London Telegraph. This belongs to Mrs. Elliott, a member of a family resident in this district for centuries, who has decided to sell. This village has many historical and literary associations, which chiefly center round its westerly portion, where stands the old Elizabethan habitation now known as Shakespeare farm.

It was here, when the house was a wretched hovel, then named the Old Shippe, that Shakespeare. It is affirmed, used to stay when journeying to and from Stratford-on-Avon.

Find New Fertilizer.

An important addition to the fertilizer supply of the United States is to be made.

About 2,500,000 acres of lands in Wyoming, Idaho, Utah and Montana, containing valuable phosphate deposits, have been divided into areas not exceeding 2,500 each, according to the Journal of Industrial and Engineering Chemistry.

For years these lands have been awaiting congressional legislation in regard to the leasing of phosphate deposits in public lands. Regulations in this connection have now been approved by Secretary of the Interior Payne. Applications for leases are to be filed with the local land office for transmission to the secretary of the Interior.—Chemical Round Table.

Peanut Production.

Alabama is the leading state in peanut production, with 6,840,000 bushels to per acre in 1919, while five other states produced from 3,400,000 bushels to 5,500,000 bushels each. The total production of peanuts in the United States last year was 33,300,000 bushels, having a cash value of \$21,900,000. Last year the average price paid for peanuts was \$2.40 per bushel.
