

Financing a Nation "at Work"

Do you realize that the continuous operation of our industrial plants depends upon an unfailing supply of banking accommodation, credit, or more briefly, loans? It is the function of the Federal Reserve System to insure at all times an ample supply of such loans for current commercial needs. These loans are made available through banks which are members of the System. By banking with us, you aid in this process and enjoy its benefits.

Quaker Heat is Quicker Heat —and Cleaner too

The Quaker Pipeless Furnace is built of heavy riveted boiler plate steel—and steel radiates heat three times as fast as cast iron. That is why Quaker heated homes are always so comfortable on cold mornings. Just open the draft and up through the Quaker Register pours an enormous volume of warm, pure, clean air. Before you buy a furnace, find out about the

QUAKER

"The Pipeless Furnace
that is built of Steel"

It not only gives you quicker heat but more of it from the same fuel. Every corner of every room is warmed thoroughly. It's cleaner too because every joint is riveted tight like a steam boiler. Can't leak gas, soot or ashes like the cement joints of cast iron furnaces do. Fine pot is lined with high temperature fire bricks. Hold heat extra long. Won't crack nor burn out. Handy water filler outside of furnace keeps air moist and pure. The Quaker is the ideal heating plant for homes, schools, churches and stores. Easily and quickly installed in any old or new building.

Santell-Ewert Orchestra

NEW SHOW TODAY

She was tired of being the only "live one" in a village of sleep-walkers.

So she breezed in on the great white way and put over a cabaret dance act that was a riot.
