

Financing a Nation "at Work"

Do you realize that the continuous operation of our industrial plants depends upon an unflinching supply of banking accommodation, credit, or more briefly, loans? It is the function of the Federal Reserve System to insure at all times an ample supply of such loans for current commercial needs. These loans are made available through banks which are members of the system. By banking with us, you aid in this process and enjoy its benefits.

You are vitally interested in Oregon having a port equal to any port on the Pacific coast. Initiative measure No. 210 on the ballot to be voted in November will provide Oregon with such a port. The cost will be borne by the people of the Port of Portland but all of the state must vote on it. Vote 310 YES on the ballot on November 2nd. (Adv.) 06

Dix Against Measure—
C. C. Dix, of Portland, was in the city yesterday arguing against the proposed anti-compulsory vaccination amendment. He has been in a number of southern Oregon towns showing what the effects would be on the public health if the people pass the measure at the coming election. The bill seeks to abolish all forms of vaccination, inoculation and medication, making impossible the best use of inoculations by the physicians. Quarantine would be impossible also, according to Dr. Dix.

Fords in Collision

Two Fords were made into cases for the repair man last night when Dr. Loughridge and C. C. Brown, of Holland, collided head-on near Wonder. The two cars were travelling at a very good rate of speed and were rounding the curve this side of Wonder. Neither of the drivers saw the other car approaching until too late to stop. Both applied their brakes and had almost stopped when they came together. The car driven by Dr. Loughridge has a bent radiator rod and a sprung axle. The other car had a hole punched in the radiator.

Quaker Heat is Quicker Heat —and Cleaner too

The Quaker Pipeless Furnace is built of heavy riveted boiler plate steel—and steel radiates heat *three times* as fast as cast iron. That is why Quaker heated homes are always so comfortable on cold mornings. Just open the draft and up through the Quaker Register pours an enormous volume of warm, pure, clean air. Before you buy a furnace, find out about the

QUAKER

"The Pipeless Furnace
that is built of Steel"

It not only gives you quicker heat but more of it from the same fuel. Every corner of every room is warmed thoroughly. It's cleaner too because every joint is riveted tight like a steam boiler. Can't leak gas, soot or miles like the cement joints of cast iron furnaces do. Fire pot is lined with high temperature fire bricks. Hold heat extra long. Won't crack nor burn out. Handy water filler outside of furnace keeps air moist and pure. The Quaker is the ideal heating plant for homes, schools, churches and stores. Easily and quickly installed in any old or new building.
