WANTED—Good farm team not less than 1200 pounds. J. Z. Faucet, Wilderville. 08

OLDEST LIVING ARTIST.

Abington, Mass., claims the oldest living artist in New England. She is Mrs. Mary Delilah Porter, who is now 92 years old. While holding a position high in standing among painters, the woman, peculiarly, did not take up painting until she was more than 50 years old.

At that time, happening to be in Maine on a visit, she became acquainted with a woman who gave lessons. She at once took up the art and immediately made great progress. In fact, in a comparatively short time she was giving lessons herself. In her home there are numerous excellent pictures, and during the last five years she has painted five pictures, considered a good number under the existing conditions which include shortage of materials.

Mrs. Porter was born in Cornwallis, N. S., coming to Abington at the age of 26 years. She is the mother of six children, and at present lives with her son, Lysander, and two grandchildren. —Boston Post.

Both Treated Alike.

At the local servants' club there were one or two who were trying to preach bolshevism and the removal of class distinction both in society and on the railway and lots of other nice things.

But they found a strong opponent in a chauffeur who drove the local laundry lady on her Monday round of visits.

"No such thing as stuck-upplishness about her," the loyal servant insisted.

"Well, but don't she order you about?" demanded the disciples of freedom.

"Of course she does," he replied, "but she bows at me just the same as what she does her husband. She don't make no difference between me an' him, even!"—Answers, London.

Egg-Hatching Periods.

Birds such as the catbird and other perching species, which have altricial young needing care in the nest for some time, do not incubate their eggs as long as those like the shorebirds and ducks which have precocial young, says the American Forestry Magazine. The eggs of most common small birds require incubation for from ten days to two weeks. Those of the fowl-like birds such as the ruffed grouse about three weeks, those of the ducks about four weeks, and the eggs of the emu, a large ostrich-like bird of Australia, must be incubated for about ten weeks.

Defining Friends.

Friends are the people that some fellows expect always to get them out of trouble.—Detroit Free Press.

WOOD BIDS WANTED

At its regular monthly meeting to be held at the office of the clerk Monday evening, November 1, 1920, the Board of Directors of School District No. 7, of Josephine County, Oregon, will receive sealed bids for the sale and delivery to the said district of four hundred tiers of body fir wood, said wood to be cut in two foot lengths and delivered on the ground at the various school houses of the district, at the option of the board, well piled ready for measurement by the board. All wood must be cut from the body of sound green trees free from rot, dote or punk and diameter to be not less than four inches and not more than ten inches (seven inches round timber), round timber not to exceed twenty per cent of the entire delivery. The Board reserves the right to reject any and all bids.

EDWARD S. VAN DYKE, Clerk.

Hammermill Bond printers at the Courier office.

Removing Ink Stains.

To remove ink stains from either brass or copper a very simple remedy is required, but it is well worth knowing, as otherwise ink split on brass or copper inkstands and left to dry is a trouble to remove. Simply pour a few drops of fresh ink on the old stains and rub with a piece of rag, when the old stain will disappear quite easily. Polish in the usual way.

Valuable to Science.

The telescope gives enlarged views of distant objects, the microscope shows only what is almost in contact with its lens, and by giving a means of making intermediate observations the modifications of the Davon microscope have proven a boon to the naturalist. With great depth of focus and a large field of view, the short focus type, for example, has a working distance of 10 to 18 inches, and magnifies 15 to 38 diameters. An adjustable rubber-tipped rod serves as a rest to support the instrument at the desired height for studying such objects as insects, plants and rocks.

Mr. Beard, of Los Angeles, is looking over the locality with the intention of locating here.

Wm. Higgins, wife and daughter, of Portland, who have been visiting at the C. M. Jolliffe's returned home Thursday.

Jim VanDorn and Elsie Craft were married Tuesday at Grants Pass.

Their friends wish them real success and happiness.

Jim Noble was in Ferrydale Tuesday. (Ruth Farman returned home with him to stay with Mrs. Noble who has been ill.)

R. S. Crockett, with some friends of Hugo, were on the river fishing Monday.

VOTE 305 XNO

WARNING!

On November 2nd you will be required to vote on the so-called Oleomargarine bill. The instigators of this vicious measure would have you believe that its purpose is to regulate and license.

THE REAL PURPOSE IS TO KILL A GREAT OREGON INDUSTRY

It is directed against the manufacture and sale of Oleomargarine, Nutmargarine and all the many kinds of spreads used for bread by thousands of people in our state who cannot afford to pay the price of butter.

Facts to Remember!

- 1 The OLEOMARGARINE BILL will in any way benefit the Dairy industry of Oregon by the implied strengthening of the market or increasing the consumption of dairy products.
- 2 The local butter industry is entirely regulated by national demand and the manufacture and sale of Oleomargarine and Nutmargarines can never, in the least, affect the dairy industry in the state.
- 3 Further state legislation in the form of the so-called Oleomargarine Bill is not necessary because the Government already has 79 pages of regulatory and licensing laws governing the operation of this legitimate industry. Deception and fraud are impossible.
- 4 The Oleomargarine Bill is an attempt to dictate to you what you shall or shall not purchase in the way of a spread for your bread.
