

SEEING IS CONVINCING

A pair of shoes that we sell for \$6.98 is now selling for \$5 to \$7.0 elsewhere.

BOYS HIGH TOP SHOES are selling here at \$3.65, \$3.95, \$4.98 and \$6.25—saying you real \$\$\$.

WHY?

the Eastern market is 6 months ahead of the west—C. J. Breier is now in New York. Mr. Breier does not make buying a sideline—he and his assistants are busy all the time buying merchandise at the right price.

LADIES TAN CALF military heel, lace boot...\$6.50

LADIES VICI KID military heel, lace boot...\$6.98

LADIES CHESTNUT BROWN Louis heel, lace boot, why pay \$16 elsewhere.....\$9.85

SAND BUCK LACE BOOT Louis heel, Goodyear welt, value \$15, eastern price...\$4.98

BARGAINS IN MENS SUITS

OVERALLS Blue Bib, 220 weight.....\$1.98

3 INAPPROPRIATE NAMES FOR FAMILIAR ARTICLE

Storage Battery Is a Misnomer and So Are Some of the Other Names It Is Called

It's funny how car owners call their storage batteries names when they fail to perform the duties for which they are intended.

Nine times out of ten it is the owner who should be called names for not giving his battery proper attention. Be that as it may, the storage battery is one of the most inappropriately named parts of the car.

Contrary to the generally accepted opinion, it does not store electricity. It generates current through the

chemical action of a sulphuric acid solution on the lead plates.

But why, you may ask, must the battery be charged with electricity before it will give out electricity? Simply this, the passing of an electric current through the battery is necessary to put the plates and electrolyte in the proper chemical condition for the production of electricity. This is what charging does. Changes the lead sulphate in the negative plates into spongy lead and the lead sulphate in the positive plates into lead peroxide.

In these operations acid is formed and goes back into the electrolyte. This is the action stated in its simplest form. Discharging results in the reverse action. You don't fill the battery with electricity and use it

until it is gone; you treat its chemicals with electricity so that it will produce electricity.

The English call a storage battery an accumulator, but that is no im-

provement, for it does not accumulate any more than it stores.

The scientific term is secondary cell but as it isn't at all descriptive it is never likely to become popular.

So I reckon storage batteries will continue to supply starts and lights for automobiles whether that name is accurate or not.

E. A. ADAMS.

Here is Your Opportunity!

To secure your new Fall and Winter Suit, Overcoat, Hat, Shoes and other Furnishings at greatly REDUCED PRICES.

Gigantic Stock Reduction Sale Still On

—and there are many very attractive Bargains in every department of this stock of men's and young men's High-Grade Apparel. Nearly every day we are receiving goods that were purchased last Spring at right prices which we also include in this Great Sale—in fact—Nothing Reserved—Everything Must Go.

It will pay you to anticipate your needs for the next six months and then take advantage of this Opportunity and Save Money—Buy Now.
