GERMAN BANK STARTS TO FOSTER INDUSTRY

Berlin, Nov. 3.—A new bank capitalized at 11,000,000 marks has been organized here by a syndicate of German bankers and industrialists to foster trade relations between Germany and Russia. The new institution will cooperate with Petrograd and Moscow banks as well as with leading Russian industrialists. It is proposed to include the Baltic and border states in the newly formed bank's sphere of influence.

The Vossische's financial editor says that the lively interest displayed by the United States and England in Russian trade relations should be an incentive for Germany to turn her trade eye to the east.

He declares that world conferences will discuss the European situation in vain so long as they continue to exclude Russia from their economic calculations.

Hamlet's Advantage

"The play's the thing!" exclaimed Hamlet. Then he added aside: "Fortunately the cinema has not been invented, so the king cannot forsake my show to go to the movies."

Making Glass of Rice Husks.

Experiments have been carried out in Burma with the idea of utilizing the silica content of paddy, rice husks, in the manufacture of glass. On burning the husks about 18 per cent of white ash is obtained, and, although this ash contains small quantities of iron, it has been proved to be suitable for the manufacture of glass having a pale green or yellow color. In burning the husks sufficient heat is generated to carry out the various processes.

Cause for Admiration.

Mildred's mother married an elderly looking man with a gray beard. When Mildred's aunt asked her if she liked her new father, she said, "Oh, very much indeed—he looks like Santa Claus."

Devilfish Overcame Whale

According to some naturalists, the squid, or cuttlefish, is the principal food of the sperm whale. But apparently the game is not always one-sided. There is told a thrilling incident of a huge sperm whale rolling on the smooth surface of the sea enveloped in the mighty coils of an octopus. Bullen, who witnessed the fight, is of the opinion that the devilfish was far larger than any of which even fragments have ever been handled by man.

WILLIAM PAYS LARGE SUM TO DOORN CITY

Doorn, Holland, Nov. 3.—The village of Doorn now begins to look upon the former German emperor as a welcome guest. His residence here, under the new tax assessment levied on the exile, is expected to increase the town's income by about $13,265 annually, being about 25 per cent of the entire municipal tax receipts of Doorn. This is the municipal share of the anticipated revenue from taxation of William's income which the Dutch government has estimated at the normal equivalent of $522,600 annually.
