USING MODERN SEWING MACHINE IN INDIA

The sewing machine in India. The old pellable method is bounded by no geographical lines.

AFTER DRAFT SLACKERS

Department of Justice Has Convicted 5,000 Men Up to This Time.

Prison sentences from 30 days to one year have been imposed on the 5,000 draft slackers who have been convicted in federal courts, according to reports from the department of justice.

The investigation of the 30,000 cases that yet remain to be looked up is proceeding rapidly, the officials say, delinquents being rounded up every day.

Approximately 275,000 cases of men who succeeded in avoiding actual entrance into the service have been investigated by the department, out of a total of 318,314 reported. About 10,000 cases of failure to register and an equal number of false questionnaires have been shown by the investigation.

About 25 per cent of the men listed as delinquents were found by the department's agents to have enlisted in the American or allied armies without the knowledge of their local boards.

Color Wain't Fast.

There was a rumbling roar like an express train with several flat wheels and a half dozen hotboxes as the big shell flew overhead and exploded a hundred yards behind the negro company. When it was over and the troops had begun to reappear from their fox holes, the sergeant gazed in wonderment at the sentry on duty.

"How come?" he demanded in surprise. "Ah done left a colored feller on dis post!"

"S-sergeant, sah," replied the sentry. "Ah-Ah-Ah was a colored feller befo' dat happen!" — American Legion Weekly.

Arts of Spinning and Weaving.

The development of the arts of spinning and weaving took place so early in the history of civilization that no records of their beginnings are preserved. At the time of Alexander's expedition to India the natives of that region wore shawls of great beauty. The Greeks learned many processes of woolen manufacture from the Egyptians, and the Romans after picking up the art from the Greeks passed it on to the occidental world. Woolen garments were worn by the Romans at a very early period. It is probable that the first lessons the ancient Britons received in the art were derived immediately after the Roman conquest.

Gasoline.

Gasoline gives off a very explosive vapor, even at ordinary temperature. This vapor is heavier than air and may be present near the floor of a room in which the odor of gasoline is scarcely noticeable to a person standing.

ALL IMMIGRANTS ARE NOW BEING FUMIGATED

Health Officers at New York Are Taxed by Influx of Italians to This Country.

Hoffman Island detention station of the New York quarantine service now has an average transient population of more than 1,000 a day, due to the inbound rush of Italian immigrants.

In addition, five doctors attached to the station have given up all thoughts of vacation and are working, one of the quarantine officials said, to the limits of human endurance in vaccinating, fumigating and inspecting prospective citizens and their families.

The reason for the unusual condition at Hoffman Island is said to be a misunderstanding on the part of Italian officials and steamship companies respecting United States health regulations. Travelers from districts where typhus and other transmittable diseases prevail are supposed to be "de-loused," examined and certified as "clean" by American public health officers before they board the ship. These regulations are not being complied with, officials here claim, and therefore the work must be done before the traveler is landed. The expense of the work here is charged to the steamship companies.

During the last week more than half a dozen ships have arrived from points where typhus-carrying subjects could be taken on board. All of these ships have been detained in quarantine while the steerage passengers, numbering nearly 2,000 on each ship, were taken off on barges landed at Hoffman Island and detained for 24 to 48 hours.

During the detention they are compelled to take a thorough bath. Their clothing, baggage and effects are fumigated in live steam. From Hoffman Island arrivals are taken to Ellis Island for examination by immigration authorities as to their qualifications for entry.

HEARD IN THE SEWING ROOM

If you wear green a great deal, you will get rich.

It is unlucky to find a broken needle on the ground.

It is bad luck for any one to give another needles.

If you tear your skirt, you will have a severe illness.

If your dress rips in the seams, you have a secret enemy.

If you see a needle sticking up in the carpet you may expect a visitor.

A new garment with pockets in should have coins in them before it is put on.

If a needle is broken in a hat the wearer will be kissed the first time it is worn.

To get grease or oil in your clothes signifies that some one has been scandalizing you.

The Chinese give a pair of trousers to a young girl learning to sew, and if she stitches them successfully she will have wealth.

On opening a paper of needles always take the third one first, for that will give you success in whatever you do with that paper of needles.

When a dress is finished and a long piece of thread is left in the needle it is a good sign, for the wearer will live long; but if short, it is bad.

When a woman who has been sewing puts her thimble on the table when she sits down to eat it is a sign that she will be left a widow if she marries.

MOSTLY CYNICAL

There are always more fishworms than fish.

Reform usually seems most urgent to a defeated candidate.

Few men can afford to be eccentric unless they are thoroughly capable.

If a man is naturally prepossessing a letter of recommendation helps him.

At one time there were 500,000 Sons of Rest in this country. Now the Sons of Unrest are having their day.

If it were not for the old girls at the picnic, there would be too much cake and not enough sandwiches.

Merely because nearly everybody believes in a certain principle is challenge enough to the expert reasoner.

After many years one can't help but be impressed with how little is accomplished by circulating a petition.

Books on child culture would be more useful if there were 10,000 books, each one varying to suit each of 10,000 children.

"California."

The name was first applied to Lower California, and probably was taken from the name of a luscious island abounding in gold and precious stones which was described in the Spanish romance, "Las Sergas de Esplandian," published in 1510.

IRISH THOROUGHBREDS HAVE WON ALL ENGLISH AND FRENCH RACES

Irish horses have won all the big races in England and France this year. Troytown won the Grand National, Tetratena the Two Thousand, Spion Kop the English derby, Charibelle the Oaks and Comrade the Grand Prix, the French classic.

The picture shows Spion Kop being led by his owner, Capt. Giles Loder, just after the horse had won the greatest racing event in the world, the derby at Epsom Downs. Spion Kop was considered a rank outsider, the odds being 100 to 6 against him, but Frankie O'Neill, the American jockey, seen astride him, piloted him to victory.

A Victrola Any Home Can Afford

This wonderful instrument—a Victrola—makes it possible for every one to enjoy the best there is in music and entertainment.

It brings the opera, the concert and the vaudeville stage within the reach of all—right into the home.

Let us put a Victrola into your home today.

MACHINE WORK

ANOTHER THING TO BE THANKFUL FOR

The high grade welding work done by this firm, which saves you money on your costly machinery. Why lay out good money for new parts when our welding will save them for years of usefulness.

MONEY IN OUR FEED

Money saved by ordering our stock and poultry feed in quantities. Money made by improving the health and quality of your animals, thus adding to their value for breeding and selling. Order a bag or two of our special feeds for your horses, cows, pigs and poultry. A short trial will convince you of its superiority.
