OREGON WEATHER

Weather for the Week

Pacific Coast States: Unsettled, and occasional rain. Temperature normal.
Tonight and Sunday fair. Colder tonight.

WHAT IRRIGATION DOES

Few people realize the wonderful development that comes to a community with irrigation," said J. W. Harrison, the San Francisco financier, who was in Grants Pass during the week. Mr. Harrison said that the interests which he represents first commenced the financial backing of irrigation districts more than a decade ago, and that recently investigations had been made by University of California experts to determine the changes that irrigation had wrought in these various districts. He spoke particularly of the Turlock-Modesto district in California which was financed by Mr. Harrison and his associates after the district had gone through ten years of turmoil and strife in an attempt to organize and build its project. At the time the district was successfully organized, the report showed, the

81,000 acres were held by 81 individual owners. The population of the town of Modesto was 2500 and that of the district outside of the town was 1000. The 81,000 acres are now held by 2024 individual owners, or about 40 acres per tract, while the present population of the district is 24,800. The production and the wealth of the district are upon the same scale of increase, and every farmer has found prosperity and contentment.

PLEASURE AND PATRIOTISM

The movie has in a large measure crowded the flesh and blood actor off the stage, but the voiceless drama can never entirely take the place of the real thing. Because the film offers salaries that exceed the earnings of the actor upon the stage, the traveling company has ceased to travel. In communities like Grants Pass, however, where the home production of actors and actresses is sufficient for local consumption, the barn storming aggregations will not be missed. There is real talent here. If you doubt it, truth of the statement will be found at the local opera house next Wednesday evening, when "Klimatic Kapers" will be the vehicle through which this great historic talent will be brought out from under its bushel. And those who know say that this coming show will be a real scream. It will be action from start to finish, and every number will be a feature number.

"Klimatic Kapers" is sponsored by the Chamber of Commerce. It should

be supported by the entire community, not only because you will get your money's worth, but also because in these matters of local enterprise, where the cause is a community cause, it is a duty you owe your neighbors. You will see your friends and neighbors in a new character and will recognize new lights and shades in their makeup, both literally and figuratively. You will also be aiding in the support of your home town and district by helping supply the cash necessary to spread the fame of Josephine before the world.

As a matter of entertainment you can not afford to miss it, as a patriotic man, something you owe the community, you must give if your support by purchasing tickets and attending the big show.

LUMBER REMAINS PROPERTY OF GRANTS PASS IRRIGATION DISTRICT

During the recent flood in the river, several hundred feet of new lumber to be used in the construction of the Savage Dam was carried away by the stream and floated down stream where considerable of it lodged along the banks of the stream. This lumber consisted principally of new 2x4, 2x6, 4x6 and 6x12s. The 2x6 and 4x6 lumber was surfaced

one side and two edges and the 4x6 was surfaced four sides.

The Shattuck Construction Co. has detailed men to recover this lumber. They have been reliably informed that certain persons have retrieved this material and hauled same away. Their operatives have been gathering information which will lead to the return of the larger part of this lumber, and the Grants Pass Irrigation District will appreciate information leading to the whereabouts of that portion not yet located.

There was also carried away by the flood waters one 6" centrifugal pump and one vertical 8 h. p. gasoline engine, both of which were carried down stream below the dam where they have been located.

We have been informed that legally this remains the property of the Grants Pass Irrigation District, and persons hauling away any of this lumber are doing so at their own expense.

SHATTUCK CONSTRUCTION CO.
E. J. CARRILLO, Supt.

SAYS THE OWL

Friendship and confidence are plants of slow growth.

A fisherman has plenty of time in which to think out sealy stories.

When a woman tugs at a man's heartstrings it's likely to pucker his purse strings.

The reason, Luke, why women are so foolish is that they were made for the companionship of men.

The young man who probes the poetry of his young lady acquaintance is wise beyond his years.

A good many men who try to ride the wheel of fortune puncture the tire before they get very far.

Too many men are engaged in the profession of carving pine dry goods boxes with a pocket knife.

It is a jury trial indeed when the twelve good men are compelled to listen to long-winded lawyers.

Wisdom is to put your trust in Providence, but it's unwise to go around looking for holes for Providence to pull you out of.
