Ford
THE UNIVERSAL CAR

**Lowest in Price—
Highest in Quality**

Every part of the Ford Chassis subject to any stress or strain is vanadium or molybdenum steel—with three to four times the strength of the highest quality ordinary steel, because of Ford heat treatment methods.

The entire Chassis weight only 1080 lbs.—the lightest automobile chassis in the world, and the strongest because of the quality in each part of it. If freight cars were made of the same quality material each car could carry four times its present capacity load safely!

The Ford Chassis is the highest quality material in any automobile regardless of price.

Yet the Ford car is lowest in first cost; lowest in depreciation cost; lowest in tire cost; lowest in cost of upkeep, maintenance and repairs.

It is the Universal Car—the car everyone can afford to own and to drive. Every family in Oregon needs one—to save time, to promote health, and to bring the Oregon mountains and streams closer to your own home.
