# LIVE STOCK

## KEEP PUREBRED LIVE STOCK

North Dakota Farmer Eliminates Runts by Liberal Feeding and Proper Management.

(Prepared by the United States Department of Agriculture.)

To obtain the most rapid growth and best development of live stock keep good stock, and see that nothing checks its growth from the time it is born. This is the method by which a North Dakota farmer prevents runts among his animals.

In a letter on this subject to the United States Department of Agriculture, which has been studying the causes and prevention of undersized

There is No Excuse for Runt Pigs.

animals, he says, "In the 40 years of my farming and breeding and raising live stock of all kinds I do not remember a runt in any class or breed. I have always been a liberal feeder and a good caretaker. Besides, all stock had access to good, fresh water at all times. With this, in addition to good shelter and ventilation, it seems that my young stock would not stop growing from the time they were born. "So good judgment in feeding, and don't neglect the details."

A farmer in Vermont writes, "A well-bred animal well cared for will not produce runts. There is absolutely no excuse for one in live stock or poultry. By well-bred live stock I mean strong, healthy stock, well taken care of for several generations, and bred for constitution. This has been my experience from boyhood, first with rabbits and game fowls, and later with sheep, hogs, horses and cattle. An accident to a well-bred and healthy animal will, if the accident occurs before it reaches maturity, affect its size but not its productive capacity. That is, it will not influence its ability to produce such young as it would have had if no accident had occurred. Eliminate all females that are not good mothers, and you will soon stamp the whole herd with constitution. Then with care, which means attention and feed, your runts will fail to materialize."

### ONLY BEST PUREBREDS SOLD

Some Breeders Insist That Every Animal They Buy or Sell Must Pass Standard.

So strongly has the purpose of the better-sires campaign, now being conducted by the United States Department of Agriculture, appealed to some breeders that they are not content with purebreds only, but every animal they buy or sell in addition to being a purebred must pass a standard of excellence. The methods of one breeder in Upshur county, West Virginia, according to a report received by the department, illustrate this tendency. This breeder has a fine herd of Angus cattle. All calves which fall below the standard of excellence that he has set are not registered, but are either castrated or sold on the open market as common cattle.

### GIVE EWES NUTRITIOUS FEED

Animals Entitled to Liberal Treatment While Carrying Young and Growing Wool.

After the ewes are bred they are growing their young, growing a crop of wool, maintaining their own body and should be fed accordingly. Give the ewes enough good, nutritious feed to keep them in a good healthy, thrifty condition. Where pasture is abundant, they will need no other feed, as green feed is the natural and best feed for sheep.

### BROOD SOWS NEED EXERCISE

Good Plan to Compel Animal to Come Out of Sleeping Quarters for Her Daily Feed.

Brood sows need exercise to avoid becoming too fat at farrowing time. Exercise can be forced on the sow by forcing her to come out for feed instead of feeding close to the sleeping quarters.

### EXCELLENT FEED FOR HORSES

Carrots Are Particularly Refreshing to Hunter or Work Animal—Usually Fed Raw.

Carrots are not excelled as a food for the horses. They are particularly refreshing given to a hunter after a hard day over rough country, or to a work horse. They are usually fed raw or sliced.

# Facts

about your crankcase

Road dust, carbon, fine metal particles and other impurities accumulate in your crankcase oil from engine operation.

The gritty oil circulates through your engine, impairing its performance, and ultimately leads to rapid depreciation and repairs.

Automobile manufacturers recognize this danger, and in their Instruction Books, carefully advise regular draining and flushing of the crankcase.

These important instructions are often disregarded; cleaning the crankcase is a job generally disliked.

To meet this need, Modern Crankcase Cleaning Service has been established by first-class garages and other dealers, co-operating with the Standard Oil Company. These garages and dealers use Calol Flushing Oil, — the scientific agent that cleans out old oil, dirt, grit and other impurities, and does not impair the lubricating efficiency of fresh oil used.

The cleaned crankcase is refilled with the proper grade of Zerolene.

STANDARD OIL COMPANY (California)

Look for

the garage or dealer displaying the sign shown here—It means "Better operation and longer engine life." A service promptly given at a nominal cost.

## MODERN CRANKCASE CLEANING SERVICE

Use CALOL FLUSHING OIL ZEROLENE

"for better operation and longer engine life"

CUTTING AND FITTING That shows in the finished result a job best described as "tailored-to-order." Styles that combine serviceability with looks, facility in quick putting up of the top and easy handling together with best durable materials and reasonable prices. Get our estimate. G. B. BERRY
