San Pedro, Cal., Sept. 27.—(A. P.)—Two men, R. Griffin and Vincent Paulsberg, seamen, lost their lives when the U. S. submarine R-6 sank, it was officially announced today. The third man missing early today, has been accounted for.

San Pedro, Cal., Sept. 27.—(A. P.)—The United States submarine the R-6 sank in Los Angeles harbor last night. At an early hour today three men are believed to have lost their lives. Portland, Ore., Sept. 26.—(A. P.)—Failure of several stars to report for football practice at the Multnomah Amateur Athletic Club here has dampened the hopes of the club members for a winning eleven.

Multnomah's first game is against Whitman College here October 1. On October 8 the team goes to Corvallis, Ore., to play the Oregon Agricultural College. Philbrook thinks the Oregon Aggies will be the best team in the Pacific Northwest this year, so hopes to make a showing against them.

### Have You a Crepis Handy? A. B. Houghton Wants One

Introducing the crepis. Traveling north in a high priced car, Dr. A. B. Houghton, head of the department of genetics at the University of California, stopped off in the city Monday night, and appealed to the forest service for aid in locating said crepis. This gives a clue to the nature of the, —er, plant. "The crepis," said Dr. Houghton this morning, "is expected to help solve some of the problems of heredity, and is a recent stride in the study of this subject, and much depends upon its being found." Specimens from Europe, Africa and South America are already in the possession of scientists at Berkeley, but so far no known plant has been found on the North American continent. The doctor expects to find a crepis along the coast, if he has to go as far north as Alaska. Sifting the vast number of scientific terms Dr. Houghton used, the crepis is found to greatly resemble the dandelion, the leaves growing in rosette form, while the flower is also yellow. He knows of no local term under which the crepis may be disguising itself in this vicinity, so crepis will have to stand in the way of introduction.

London, Sept. 27.—(A. P.)—England needs 8,500,000 more hens in order to get back to the estimated consumption for 1913 of 120 eggs per person, asserts Edward Brown, secretary of the National Poultry Council.

### MAIDS REFUSE LOW WAGE SCALE

Domestic Labor Scarce in New York. Housewives Do Own Work

New York, Sept. 27.—(A. P.)—Domestic labor is so scarce in New York that in thousands of homes, normally well supplied with servants, the mistress is doing her own housekeeping. Maids and butlers are said by employment bureaus to prefer being out of work to taking jobs at less than the high wage scales prevailing last year.

Of many reasons advanced by employment agencies for the failure of servants and employers to agree, one of the most common is that prospective maids seek work only because their husbands are jobless and are refused places because prospective employers will not consider applicants for temporary positions.

### "FATTY" WOULD THROW VIRGINIA OF WINDOW

WITNESS SAYS THAT ARBUCKLE THREATENED DYING GIRL IF SHE DID NOT STOP CRYING

### COURT HEARS STORY OF PARTY

Wild Time in Rooms of Movie Star Are Related by Zeh Provost in the Trial Today

San Francisco, Sept. 27.—(A. P.)—Zeh Provost, show girl at the Arbuckle party, testified today that Arbuckle followed Virginia Rappe into the room adjoining the one where the party gathered, and three quarters of an hour later when the door was opened the women found her fully dressed, her hair down, moaning, "I am dying." Later Arbuckle said, "If you don't stop yelling I'll throw you out the window."

"We were having too good a time to notice what time Miss Rappe and Arbuckle left the party in his suite," replied Miss Provost to a question of the defense. "Miss Rappe sort of skipped into room 1219," she exclaimed. At the same time Lowell Sherman and Alice Blake went into room 1221, the other room opening off 1220, she said. When Arbuckle followed Miss Rappe she did not hear any bolt turn. She said she followed Lowell Sherman and Miss Blake into room 1221 to powder her nose. Returning to room 1220 she found the place empty, but Mrs. Delmont and Ira Fortlous appeared on the scene before long. Mrs. Delmont was then dressed in pajamas, said the witness.

San Francisco, Sept. 27.—(A. P.)—Some actual improvement in the demand for lumber is reported from states of the Twelfth Federal Reserve District, John Perrin declared in a report made public here today.

Stiffening of prices in the upper grades of Douglas fir, stationary or declining prices for California redwood and white and sugar pine, and decidedly more hopeful feeling as to future business prospects also feature the lumber industry at this time, the report said.

"August production of 356,233,000 feet of lumber, according to reports from the four lumber associations in the district, was 26,890,000 feet greater than the July cut, an increase of 8.1 per cent," the report said.
