OREGON WEATHER

Weather for the Week
Pacific Coast States: Generally fair, with normal temperature.
Fair tonight and Saturday.
Heavy frost in the interior in the morning.

GRANTS PASS TASK

During the first part of next month when Grants Pass entertains the veterans of the Civil War, the visitors should be made to feel that they are more than welcome and that there is an appreciation of the principles for which they stand, as well as an appreciation of their own services.

The matter of decorations for stores, homes and streets is now taking the attention of the committee in charge. It is the object of the committee to have every place of business furnish that part of the decorations which lies within their jurisdiction, namely their show windows. Even if it is no more than the display of an American flag, it is felt that something should be done.

EAT LESS SUGAR

Another rise in the price of sugar has been noted. In the face of a nation-wide boycott on the use of the sweet, the large sugar concerns are attempting to keep the prices at the point to which they have been raised.

It isn't necessary to wholly discontinue the use of sugar. A more moderate consumption on the part of the millions of people of the nation would make a material decrease in the amount consumed. The only possible reason why prices would mount is that the demand greatly exceeds the supply.

Daily News Letter
Gossip of Staff Correspondents at World Centers of Population

Chicago, May 11—(I. N. S.)—The shortage of laborers—both skilled and unskilled—which is reported to be acute in all trades and industries throughout the nation this spring has been flatly denied by a local labor service agency. All that is necessary to remedy the reported shortage, this agency asserts, is to put the thousands of able-bodied idlers of the Southern section of the United States to work in the mills and factories, most of which are said to be in dire straits as a result of having to operate short-handed.

In a letter received by International News Service from this employment agency, they explain their views on the topic in the following manner:

"Gentlemen—The Chicago American report published relative to labor shortage advanced by your service carefully read.

"We can supply anywhere from 10 to 16,000 first-class negro laborers from the South. There are thousands of able-bodied men down there who want to work and cannot find it down there.

"We can deliver men in from 10 to 15 days direct to plant.

"So please acquaint us with firms that want negro labor. We can handle any order and for any number.

"Yours,

"(Signed) GEORGE W. PARKER."
Inasmuch as several states in the South, specifically Louisiana, Florida and Georgia classify interstate traffic in labor as a violation of state laws, it is freely predicted by Illinois employers that this agency's officials would find themselves in the toils of the law should they attempt to transport laborers from those states to industries in other localities.

No more will gay young Lotharios—the "undergrads"—of Northwestern University, sally forth with winsome co-eds seven nights a week in quest of amusement. They have decided to join the girls in observing three dateless nights each week.

This action was taken by fraternities in the interest of men students working their way through school, who are not able financially to engage in extensive social life. Fifty per cent of the men students are earning their own way, a recent survey revealed.

Approval of the men students' voluntary regulation was voiced by Walter Bill Scott, president of the university, who said:

"The students and faculty wish Northwestern University to be an aristocracy of brains, not an aristocracy of money. We want to give the brains a chance to survive instead of being submerged by excessive social activities."

President Scott also stated that the men took their stand, realizing that fewer social engagements will

Quick Starting SHELL GASOLINE
You'll never know how satisfactorily Shell gasoline can serve you until you try it. You'll never know the power it gives nor the speed it can develop until you use this dynamic motor fuel in your own car.
The next step, therefore, is to drive in at any Shell dealer's and fill your tank to thoroughly test its splendid qualities.
SHELL COMPANY OF CALIFORNIA

result in higher standards of scholarship and more attention to development of athletics.

Evangelist Gives Talk—

"The Great Seal of Jehovah is the Sabbath of the fourth commandment. Those who observe it are showing thereby their allegiance to the Creator of the universe. Those who violate it, when they know the facts concerning it, are disloyal to God," said Evangelist T. L. Thuemler, in his lecture at the Seventh Day Adventist church last night on East E street. Mr. Thuemler's subject last night was the Christian Sabbath. The subject tonight is "Sunday in the New Testament."

BORN

WEBER—To Mr. and Mrs. Henry Weber, of this city, Wednesday, May 9, a son.

Another Air-Propeller Boat.

While there is nothing absolutely new in the idea of driving a boat by means of an air propeller, a craft recently invented is distinctly novel because its builder has made use of a much larger propeller than is generally employed for this purpose. This air-driven boat has been constructed in France, where air-driven craft have always attracted considerable attention on the part of ingenious Frenchmen. The propeller is mounted on a tall skeleton stand, an extension of which may be used as a mast. The propeller turns at a slow rate, but owing to its large spread it moves a sufficient volume of air to propel the boat along at a leisurely speed.—Scientific American.

World's Largest Organ.

The largest organ in existence is in Sydney, New South Wales. The erection of the great organ in Music Hall, Boston, by a German builder, Walcker, of Wurttemberg, gave the first impetus to public interest in the matter. Roosevelt of New York and Jardine, likewise of New York, soon became two of the best-known organ builders in America. Among the largest organs in America are the organs of the Roman Catholic cathedral, Montreal; the Cathedral of the Holy Cross, in this city, which possesses 83 stops; Music Hall, Cincinnati, with 96 stops and four manuals, and the Tremont Temple of this city with 65 stops.—Boston Globe.
