The bridges are for the steam shovel which is to operate on the new highway grading contract, the shovel having been taken to Patrick creek on the old road. About 3 1/2 miles of temporary road construction was necessary in order to get the steam shovel to the point of permanent work, and the six bridges across the creek were a necessity. The shovel crew has been busy since April 26 and is yet a short distance from the survey of the permanent route.

**Great Leader's Boldness.** Lord Bacon in his essay on "Boldness" repeats the story of Mahomet's promise to his followers that on a given day he would move by his word a nearby hill. When the day came, Mahomet ordered the hill to move, but it did not move. Then Mahomet calmly announced he would go to the hill since it would not come to him. Bacon uses the incident as an example of boldness.

**Music and Work.** Men should have music with their work instead of with their play. Chopin's nocturnes induce in an office worker an emotional state that dispels anger, while a manual worker will toil twice as hard to a march or a fox-trot tune.—Jack Hylton.
