

Stray Bits of Wisdom.
Everything in this world can be borne except a long succession of beautiful days.—Goethe.

YOUNGER FILIPINOS NOT EAGER FOR SELF-RULE

Yorkville, Ohio, June 30.—(I. N. S.)—The younger generation of Filipinos—those who have had the advantage of training in American schools—are not urging independence from the Philippines, according to Emilio A. Alba, Jr., son of a Manila sugar plantation owner. Young Alba, a student in Chicago, is working at a local tin plate plant for a "practical education."

Although the elder Filipinos want their own government the younger Filipinos, Alba said, fear that Japan might seize the islands if the United States relinquishes control. The younger Filipinos, he stated, also realize the progress made under American control.

Let's be Condemned.
Pedantry in learning is like hypocrisy in religion; a form of knowledge without the power of it.—Addison.

CHEVROLET ONE-DAY OUTPUT

Oakland Plant Ships 373 Passenger Automobiles in One Day

Establishing the greatest output record in its history, the Oakland plant of the Chevrolet Motor Company, on Tuesday, June 26th, shipped to Chevrolet dealers 373 passenger automobiles.

Shipments from the big Oakland factory were made both by rail and a series of big Dealers' Drive Aways. The rail shipment, during this one day, included 75 solid carloads of passenger cars going to the various Dealer Organizations throughout the entire Pacific Coast region.

While this one day's shipment of automobiles established a new record in production and shipment for the Chevrolet Plant at Oakland, the demand for this popular priced, fully equipped automobile has grown far in advance of the manufacturing facilities. The Chevrolet Motor Company is operating a number of extensive plants at full capacity and have recently erected three additional factories in eastern cities; still, the demand for Chevrolet is far in excess of the supply all over the United States.

Out here in the Pacific Coast Territory all Chevrolet Dealers are experiencing a great deal of difficulty in securing sufficient cars to supply the demand, and in many instances dealers have orders booked for from sixty to ninety days in advance of the manufacturing schedule.

Beauty of the Paper Birch.
The paper birch is taller than most birches, sometimes reaching the height of 75 feet. The birches do not droop as those of the gray birch do, nor does it seem to mind the crowding of other trees, the lack of sunlight or the perpetual gloom of the primitive forest. It stands out like a white giant in the dim distance of the dark woods.

Fighting Forest Fires.
The California district of the forest service, United States Department of Agriculture, has received \$4,000 from the Automobile Club of Southern California for the development of public camps in national forests. In addition, the automobile club co-operates very closely with the forest service in fire-prevention work. Approved methods of preventing fires are printed in the maps furnished by the club to tourists.

Blind Persons Privileged.
Blind persons who reside in Ontario may travel free of charge on the street cars of Toronto and environs. Applicants for passes on this account must be totally blind.

PLANT TREE IN RIGHT PLACE

Much of Natural Beauty May Be Lost If Proper Spot Has Not Been Selected.

It is a beautiful thing to plant a tree, but it is doubly beautiful to plant the right tree in the right place.

The deed loses half of its beauty when a tree is placed where it does not belong, and where it will be impossible for it to add to the joy and comfort of those who may be near it in future years. A tree placed in a location where it will be in the way, and where it cannot develop in accordance with its natural tendencies, is doomed to be a failure. The same is likely to be true of the tree that is planted without thought as to the variety that is best suited to the situation. It is the tree planting that involves thought and judgment that is the real blessing to humanity.

The beautiful thing in the planting of the tree is the attitude of mind of the one who does it. Those who are to receive the benefits from the act appear long after the work is done; those who do the work are seldom directly rewarded for the labor. When a person plants a tree, he is contributing to the pleasure of generations to come, and if he plants the right tree in the right place he bestows a blessing upon others in the most unselfish manner. If, on the other hand, the wrong tree is planted, the future generations cannot reap the full benefit of the work done years before by the well-meaning but uninformed tree planter, and the deed as measured by results becomes less beautiful.—Illinois Arbor Day Bulletin.

OWES SPEECH TO WIRELESS

Young English Woman, Dumb From Birth, Said to Have Become Normal After Treatment.

A young woman, deaf and dumb from birth, the first patient to undergo treatment by a new wireless invention, articulated several words in the presence of a crowded audience at the Royal Medical college, Epsom, England.

Wireless, having brought hearing to the deaf, is now bringing speech to the dumb.

This latest wonder is made possible by the invention of Mr. J. W. Theobald, a Sunbury garage owner, and a medical friend, Dr. Frank Thompson. The dumb patient puts on ear receivers, and receives a lesson in phonetics with the sounds magnified till they are deafening to normal ears.

Dr. Thompson prophesies that his first patient will soon be able to converse freely. A curious unexpected result has been that her deafness is also tending to disappear.

Molten Lava Welds Volcanoes.

George Gillman read a paper before the Geographical society descriptive of an ascent a year ago of Kilimanjaro, which he alluded to as Africa's highest mountain. The party which he led were the first to ascend after the mountain had become British territory. From wherever across the surrounding steppes one approached the isolated mountain, two outstanding features impressed themselves at once—the tremendous size, coupled with great height, and the almost incredible contrast between the tropical half desert below and the alpine desert above. Structurally, Kilimanjaro consisted of three single strato-volcanoes, each of which had had its own origin and history. Through mutual interbedding of the lava flows, however, all three had grown into one solid complex strato-volcano.

Fighting Insect Pests.

A new method of control of "screw worms," "wireworms" and sod web worms which attack tobacco and similar crops has been discovered by a tobacco insect laboratory of the United States Department of Agriculture. It has been found that these worms are very greatly attracted to nitrobenzene, and by flavoring poison with this chemical a mortality of from 80 to 90 per cent of the larvae in heavily infested fields is produced. These larvae are very important pests of tobacco and a large variety of other crops, and up to this time fall plowing and other indirect methods were the only known ways of combating them.

Women Lead in Fighting Rats.

In a state-wide rat campaign conducted in Virginia early this year, when it was estimated that more than 670,000 rats were destroyed, it was disclosed that women make as effective leaders as men in this work, according to the United States Department of Agriculture. When regarded according to the number of rat-tails turned in for prizes, seven counties led by women and three led by men were the most successful.

ing, will be performing this service not alone for her own children, but in only less measure for the children who come from homes less blessed with the finer things of life. Herein is the supreme advantage of the public-school system. I have never been able to find much satisfaction in the good fortune of families who, when they are able to do it, prefer to take their children out of the public schools and give them the doubtful advantage of more exclusive educational methods. I think we should cling to the democracy of the public schools.

"In the home must still be performed the duty of instilling into the child those fundamental concepts of religion of faith which are essential to rightly shaping the character of citizens, and therefore of the Nation. Mankind never has stood more in need than it does now of the consolations and reassurances which derive from a firm religious faith. We are living in a time of many uncertainties, of weakened faith in the efficiency of institutions, of industrial systems, of economic hypotheses, of dictum and dogma in whatever spheres. Yet we all know that there are certain fundamental truths of life and duty and destiny which will stand eternal, through the evolution and the revolution of systems and societies founded by mankind. There must be no mistake whereby we shall confuse the things which are of eternity with those which are of time."
