Heat Lightning Attracts—  
People of the city were treated to  
a unique electrical display Thursday  
night at about 9 o'clock. Heat light-  
ning, flashing up in the west at in-  
tervals of a few seconds, lasted for  
over an hour. At times the flashes  
were so brilliant that the whole  
country was lit up. The day had  
been so hot that showers fell in the  
evening.

chitect for remodeling the Masonic

Salmon Catch Drops Off—  
The salmon catch took a drop  
Thursday night, only 600 pounds of  
the Chinooks being brought in. The  
average for the past few weeks has  
been around 1000 pounds nightly  
with six boats making the drift. Two  
boats dropped out last night, leav-  
ing four to make the drift. The  
water is becoming exceptionally low,  
making the fishing difficult.

When Better Automobiles—  
Are built Buick will build them. 44

Water and Gas Won't Mix—  
Two prominent members of the  
younger set, who were accompanied  
by their lady friends, while return-  
ing from the Rogue last night after  
the bathhouse closed ran out of gas.  
The accident occurred at the inter-  
section of Sixth and G streets and  
the occupants of the car, clad only  
in their bathing suits made many  
outrages before assistance was ren-  
dered by a passing taxi. They will  
look at the gas tank hereafter.

Roads Good to Marshfield—  
Roads to Marshfield, by way of  
Dillard, are exceptionally good,  
states Oscar Johnson, local taxi driver,  
who returned from the coast  
Thursday. He made the trip in six  
and a quarter hours. He found pav-  
ement about half of the way. From  
Coquille to Marshfield the highway  
is paved and between Grants Pass  
and Roseburg it is entirely paved.  
The trip can be easily taken now,  
states Mr. Johnson.

Water Warmest Recorded—  
The waters of the Rogue are the  
warmest today that they have ever  
been since records have been kept.  
The thermometer today showed a  
rise of one point over Thursday,  
the mercury going to 74. The warm-  
est ever before recorded was 73 de-  
grees. The holding back of the  
water behind the Savage Rapids dam  
is believed to be the reason for the  
warm water.
