To the Tax Payers and Electors of School District No. 7.

On Friday afternoon, Aug. 31, at 2 o'clock p. m. at the Washington school on C street between Third and Fourth streets there will be submitted to the electors of School District No. 7 of Josephine County the question of whether or not a consolidation of School Districts No. 7 and 26 of the said county shall be effected.

The Board of Directors of District seven have investigated the consolidation question very thoroughly and feel justified in recommending the consolidation to the electors of the district.

The assessed valuation of District No. 26 for 1922 was \$84,692.16.

While figures of this year's valuation are not yet obtainable it is reasonable to assume that it will not be less than \$86,000.00. While the tax levy for the consolidated district in mills is not yet available yet it can reasonably be assumed that it will not be less than 21 mills. It can thus be readily seen that the consolidated district will realize not less than \$1800.00 from the former district No. 26 the first year of the consolidation. The only additional expense the consolidated district will be under in the education of the children of District 26 will be the cost of transportation to the city schools of Grants Pass. This should not exceed \$1500.00, leaving a margin of \$300.00 profit to the consolidated district. District No. 26 will send to the city schools the first year of the consolidation not to exceed thirty-five pupils. This number of pupils can be segregated among so large a number of school rooms that no additional teachers or equipment will be required for their education for a number of years to come. District No. 26 is what is commonly known as the Gehers district and adjoins District No. 7 on the southwest. It is composed of the land on both sides of the Redwood Highway (Crescent City road) for a number of miles, which said land is in almost its entirety served with irrigation and because of its immediate proximity to Grants Pass due to receive the greatest increase in value per acre of any land within the district. As the years come and go it will bring a revenue to the consolidated district in ever increasing ratio of profit over cost of education for its school children. Eventually, and in the event a consolidation is not effected District No. 7 will doubtless be forced to conduct a transportation system to bring the children of its own district living adjacent to the boundaries of the present district No. 26 at its own expense. It would certainly be to the interest of the district to consolidate and bring the children of district 26 to the city schools at the same time and the expense thereof is not to be figured in comparison with the increased revenue to be derived from its assessed valuation. Incidentally there is the moral obligation District No. 7 owes to the children almost within its gates to extend to them the privileges of instruction in the graded schools of a district of the first class.

Respectfully Submitted,
School District No. 7, of Josephine County, Oregon.
By P. P. Proctor, Chairman.
By Edward S. Van Dyke, Clerk.

Heavy Fine Assessed—

A fine of \$250 was assessed against Dr. V. L. Dimmick today by Police Judge H. H. Allyn. A charge of driving an automobile while intoxicated had been entered against Dr. Dimmick, following his arrest on Sunday while he was piloting his car around the city streets. A bottle, partly filled with moonshine, was found in the machine. In addition to the fine his driver's license was taken away and a 30-day suspended jail sentence put on him.

Whose turn is it? Who is "next" at the Gulbransen? The folks can hardly wait—everyone from Granddad down to little Mary wants to play that splendid Gulbransen!

It's so easy to play—it invites playing. It makes you want to pour out all the music that has been locked up in your soul for so many years and which your untrained fingers cannot express.

You may play a Gulbransen for half an hour—or half a day—and the thought of effort in connection with pedalling never comes to mind. Because there is no effort.

This leaves you free to concentrate on better playing of the Gulbransen. The result is that within a few days, or a week at most, you can learn to play the Gulbransen, through the pedals, in such a way that the music cannot be distinguished from the finest hand-playing. Gulbransen Instruction Rolls help you to understand and master this art of correct playing. They are simple, fascinating—show how to do things, through the pedals, that it would take years to learn by hand.

FOR RENT—Furnished house, 5 rooms and bath, 1301 East A. Mrs. A. Meier. 84

More Miles
in the Broad, Flat Tread

THE Lancaster people made more mileage possible by building a tire as it had never been built before—with a broad, flat tread. This improved tread soon proved its superior qualities. Its principle of construction was quickly adopted by other leading tire manufacturers.

The Lancaster semi-flat tread provides greater tractive surface. Wear is distributed over a greater area; the tire lasts longer.

The definite superiority of Lancaster Tires is recognized not only at home but abroad. Three great foreign nations have granted basic patents on Lancaster Tire construction.

ANOTHER achievement of Lancaster engineers is the "bridge-truss" beveled buttress tread. Both tread and side-walls are reinforced by this construction, greatly increasing Lancaster mileage.

Let us explain the many points of real betterment that characterize Lancaster Tires. Ask us to show you the Lancaster Cut-Away Cross-Section.

Asbestos Roof Cement
LIQUID TYPE

—WHY?

BECAUSE it can be used on any roof—canvas, gravel, sheet metal or composition; flat, steep or pitched.

BECAUSE it stops all leaks, closes every seam, gap or crevice.

BECAUSE it does not run, peel or crack and forms one unbroken protective sheet, preventing decay.

BECAUSE it is free from injurious acids and is not affected by acid or gaseous fumes.

BECAUSE it levels any uneven spots, making a smooth even surface.

BECAUSE after setting up, it does not taint or discolor water, thus guaranteeing pure rain water supply.

BECAUSE it is easily applied. Anyone can put it on.

BECAUSE it sets up slowly, retaining its elastic properties indefinitely.

BECAUSE its asbestos content is a powerful fire-resistant.

BECAUSE on account of its consistency and composition it gives a watertight roof at much less than the cost of a new roof.

BECAUSE it carries our guarantee.
