Lives in Drop of Water.

So tiny that it can be seen only by aid of a magnifying glass, an animal, heretofore unknown, has been discovered by an eastern scientist. By means of whip-lash strokes of hairlike projections covering its body it can move rapidly about in a drop of water. The little creature feeds chiefly on germs and other animals living in the water. It measures about one two-hundredths of an inch long and is less than one-fourth as wide.—Popular Mechanics.

Opportunity in Overalls?

The reason most people do not recognize an opportunity when they meet it is because it usually goes around wearing overalls and looking like hard work.—Henry Dodd.

Tey for Rent.

On the anniversary of the battle of Waterloo every year, June 18, the duke of Wellington has to present to the king a miniature flag like those Napoleon's soldiers carried: A tricolor with a brass eagle perched on the top. This little flag is the rent for the estate presented to the Iron Duke by a grateful nation.

Many Weird Fishes.

Queensland has many weird fishes. One species carries its eggs in its mouth for safety; another climbs trees and looks all round with curious protruding eyes. The breathing apparatus of these climbing fishes is situated in their tails. A third species, the mud fish, has lungs and ribs.

JIMMY MURPHY WITH HIS NEW CAR

Jimmy Murphy, famous racing driver, with his new mount which he took to Europe for the racing meet there. The machine is a new two-seated special built by Harry Miller of Los Angeles.

DRIVE CAR WITH EASE AND GRACE

Motors Show to Best Advantage Under Tutelage of the Good Form Driver.

(By ERWIN GREER, President of Greer College of Automotive Engineering, Chicago.)
When the ponies are clattering in on the home stretch, all other things being equal, it is this headiest rider that brings his mount first under the wire. Just as a Kentucky filly responds splendidly to the rein of a skilled driver, so does the thoroughbred of motors show its mettle to the best advantage under the tutelage of the "good form" driver.

Pleasure in Motoring.
Half the pleasure in motoring comes with learning to manipulate your car with consummate ease and grace. Correct form in driving means minimum strain on car mechanism and incidentally minimum drain on the pocket-book. Velvety stops and starts prevent unusual strains on the motor, clutch, transmission, axles and tires. They also cut down the consumption of gasoline and oil. A well-made motor, like a Swiss watch, is a sensitive thing. It resents abuse but responds willingly, capably to gentle handling. Starting an automobile is an art. Simple though it may be, nevertheless there are hordes of drivers who never acquire it. The master driver aims to create a steady pull on the driving mechanism from the moment he slips into first gear until the car is under full headway. To wit, a homely formula for starting which may be taken after the entire of gear shifting:
Learn to Accelerate.
Learn to accelerate simultaneously with letting in the clutch. The mechanical act of gear shifting can be learned in five minutes.
As soon as you have the car in high speed, assume a natural, comfortable position. Avoid a strained, high-tension grip on the wheel. Driving a car is not tiresome if one sits in an easy upright position. The driver who slouches in his seat must be constantly shifting. He cannot apply the brakes without sitting erect. He must change his position to shift gear.
It is quite as essential to know how to stop the car quickly and smoothly as it is to know how to start it. The operation of braking is one of the most important in driving.
Worshiped at Shrine of Speed.
The highways are strewn with the wrecks of cars whose drivers worshiped at the shrine of speed. When the crisis comes the green driver is apt to forget the counsel of his glib instructor and another accident is chalked to the toll of "I didn't know." If you must test the spirit of your car, wait until you are perfectly sure of your ability to drive, until you would be willing to be the man in the tonneau.
You have heard many an enthusiastic owner boast that his car could take such and such a hill on "high." Doubtless it will, but at the same time he is putting an unnecessary strain upon his motor when he forces such a performance. The intermediate speed is placed on the car to use. It is a mistake to allow the motor to labor.
Good Accident Preventive.
Second speed is a good accident preventive when threading the maze of city traffic. The car is easily held under leash and may be stopped gently without jamming the brakes.
Only an amateur will allow his motor to race unnecessarily. Motor racing consumes gasoline in appalling drafts, and is also hard on the engine. After you have learned the A, B, C's of car manipulation, adopt the accelerator instead of the throttle-lever on the steering wheel.
When you come to a stop in traffic, don't forget the man behind. The hand held up in warning may save a rear-end collision. Show your intention of swerving off into a side street by holding out your arm horizontally. These signs have become accepted among motorists as a universal sign language. It's these little courtesies that help to make motoring a pleasure.

AUTOMOBILE MIGHTY HANDY FOR FARMERS

Faster Than Any Other Means of Transportation.

A writer, in discussing the relation of the automobile on the farm, says that after a hard day's work it is a pleasure to get into a car and take a 25-mile spin. We rest as we do, and study the methods of our neighbors. Moreover, the automobile has another service to perform. It can bring more rapidly than your best horse "first aid to the injured." If there is an accident to a child or man, and a doctor or a surgeon is needed in a hurry, the automobile can bring him faster than any other means of transportation.
If there is trouble in the field, if some part of your farm machinery is broken down, the automobile can bring from town the needed help or the parts that you need to set the machine in motion again.
Again, the automobile brings the farmer closer to the market, whether it is the local or the distant market, and enables him to market his produce more rapidly and on better terms. The writer to whom we have referred says that he has a machine that has run for 16 months on the original set of tires, with only \$3.25 expense for patching tubes. He says the purpose of his machine is pleasure, business and marketing; that he has hauled apples, potatoes, oats, eggs, butter, pigs, calves and hitched it to the hay rope to unload hay into the mow.

AVOID TRAILING IN TRAFFIC

No Use Running Risk of Bumping Into Expensive Cars on Congested City Streets.

Here is a hint for the man who drives through congested city streets: Don't trail behind expensive cars. The best of drivers find themselves ramming into the rears of other cars

Don't Trail High-Priced Cars.

or clipping off rear fenders. It's inevitable in traffic such as we know it today.

But there is no use running the risk of bumping a \$10,000-gold-plated-palace-on-wheels when there are thousands of dilapidated buses to stick behind.

The owner or driver of an expensive car is much more likely to raise a rumpus if you hit his property because a slight scratch looks like the dickens. Some drivers of flyvers, or near-flyvers, are likely to mistake a bump for pep in the motor.

AUTOMOBILE GOSSIP

A motorist who "slips" his clutch, scorches and hardens the leather on the cone.

When planning a trip of any length, it is a wise motorist that inventories his car and its equipment.

At the same time that you grind in the valves, clean the stems of all foreign matter and make them bright and shiny.

Always be careful to attach the rope to some part of the frame and not to the axle whenever it is necessary for a car to tow another.

A small bottle of shellac should always be carried in the car as it is invaluable for many purposes in an emergency. Gasoline will not dissolve shellac.

When the starting motor for any reason lacks power to turn over the crankshaft it may be strengthened by coupling on another storage battery, connecting it in multiple so as not to increase the voltage.

COLUMBUS DAY IS OBSERVED

Schools of City Hold Programs Friday Afternoon

Schools of the city yesterday had programs in which they observed Columbus Day. The Roosevelt and Lincoln schools had special entertainments while other schools devoted some time to the occasion. The high school took up the observance through the history and english classes.

The program at the Roosevelt school was carefully planned out and pupils of the different grades took part. It follows:

"Onward Christian Soldiers".....Song
Entire Audience
"Good Bye to Summer".....Poem
Marion Minthorn
"Dixie".....Song
Entire Audience
"Columbus".....Song
Fourth B
"Dates in the Life of Columbus".....Song
"Last Night".....Song
Entire Audience
"Landing of Columbus".....Reading
Daphne Kiphart
"Awakening".....Song
Second B and Third B
"Lady Bug".....Song
First B and Second B
Recitation.....Pauline Harader
"America the Beautiful".....Song
Dialogue.....First B
Closing Exercises.....Maxine Wheeler
"America".....Song
Entire Audience
"Salute to the Flag".....Solo
Bruce Brickell
The Lincoln school gave a program for the Parent-Teachers association.

The program follows:
Recitation.....Room One
Acrostic.....Room Two
"Columbus", song.....Room Three
"Columbus" poem.....Room Four
"Columbus" song.....Room Five
"Adventures of Columbus".....Play
Room Six
"American Creed".....Room Seven
"Like of Roosevelt".....Acrostic
Room Eight

Children Work in Silk Industry.
The highest percentage of child labor in the United States is employed in the silk industry.

Hedgecrows of Walking Sticks.
More than half of the walking sticks used in England come from the hedgecrows of that country. Particularly in Herefordshire and Worcestershire there are miles of the hedges that are allowed to grow so tall that the magpies build their nests in them. The man who supplies sticks in the rough pays the farmer a mutually agreed sum a hundred for the privilege of cutting them, and these, roughly trimmed and still green, are sold to the manufacturers.

Recovers From Croup
"My boy had a very bad attack of croup. Tried everything but nothing did him much good. Then I used Foley's Honey and Tar and he not only recovered quickly but he has had no trouble since," writes Mrs. William Sims, Burlington, Wyoming. Coughs, colds and croup quickly relieved with Foley's Honey and Tar, the largest selling cough medicine in the world. Free from opiates—ingredients printed on the wrapper. Couch's Pharmacy. (Adv.)

A Course in Success

Every parent in this community is urged to make his children as familiar with their Pass Book as they are with their school books.

There's an education to be had between the Pass Book covers.

Bring your boys and girls in to get their Pass Books. And when you come, be sure and introduce your children to us as their bankers.

Grants Pass & Josephine Bank

This brand

A New Pair FREE If They Rip

Made of special woven 9-ounce denim, Indigo dyed, cut full and roomy, where the room is needed, fitted at the waist like tailor-made pants, requiring neither suspenders nor belt to keep them up.
Belt loops simply added for convenience. Plenty of big, roomy pockets. Sewed throughout with special thread. Buttons riveted on, to stay on. Finished with care, turn them inside out and inspect them.

Two-Horse Brand Copper-Riveted Waist Overalls

have the reputation of being the strongest, best fitting and longest wearing overalls on the market. Your dealer knows that our guarantee means exactly what it says.
