Take Salts If
Stomach Isn't
Acting Right

Says Indigestion Results from an
Excess of Hydrochloric
Acid.

Undigested food delayed in the stom-
ach decays, or rather ferments, the same
as food left in the open air, says a
noted authority. He also tells us that
indigestion is caused by Hyperacidity
meaning there is an excess of hydro-
chloric acid in the stomach which pre-
vents complete digestion and starts
food fermentation. Thus everything
eaten sours in the stomach much like
garbage sours in a can, forming acid
fluids and gases which inflate the stom-
ach like a toy balloon. Then we feel
a heavy, lumpy misery in the chest;
we belch up gas; we eructate sour food
or have heartburn, flatulence, water-
brash or nausea.

He tells us to lay aside all digestive
aids and instead get from any phar-
macy four ounces of Jad Salts and take
a tablespoonful in a glass of water
before breakfast and drink it while it is
effervescent, and furthermore, to con-
tinue this for a week. While relief
often follows the first dose, it is impor-
tant to help neutralize the acidity, re-
move the gas-making mass, start the
liver, stimulate the kidneys and thus
promote a free flow of pure digestive
juices.

Jad Salts is inexpensive, and is made
from the acid of grapes and lemon juice,
combined with lithia and sodium phos-
phate. This harmless salts is used
for many stomach disorders with ex-
cellent results.
