OREGON WEATHER
Pacific coast states: Prob-
ably fair in southern and cen-
tral California, and occasional
rains elsewhere. Temperature
near normal.
Fair south, rain north por-
tion tonight. Warmer east por-
tion. Saturday probably fair.

LET'S PAVE NORTH SIXTH

At the meeting of the city council, the matter of the paving of North Sixth street was put up squarely to the people of Grants Pass. If they want to do away with the unpaved section leading into the city from the north, they will have a chance to signify this by voting for the work at the coming election in May. If they want our prospective residents to come bumping into the city over a series of chuck holes and rocks, then they should vote against it. It is not only a matter of civic pride which should lead the citizens of the city to vote in favor of the work. It is the effect it will have on bringing new residents to Grants Pass. The more people that locate in the city, the more people the city will have to help pay the taxes.

The paving must be done. It has been neglected until most of the people of the city are ashamed of it. For miles the highway is paved and then as the car enters the city, it is subjected to a series of jars and bumps that create a decidedly unpleasant sentiment against the city. In line with the street improvement program, the work should be authorized and should be started without undue delay. It should have been done two years ago. By now, it would all have been paid for. It is an improvement that must be accomplished.

The city's plan is to build the pavement itself. With the equipment that is purchased, the laying of paved streets can continue in Grants Pass. The administration has realized that Grants Pass is growing and that good streets will aid that growth. And best of all, the improvement can be paid for entirely next year without an increase in the rate of taxation.

The band boys are to get new uniforms. A committee of business men has taken up the proposition and will see to it that sufficient funds are raised to garb the band in a suitable uniform. The men in the organization put in two nights a week during the summer, one in practice and one in concert. They receive only a small remuneration and most of that goes for music. They are a good advertising feature and a credit to Grants Pass. They deserve those uniforms and have their minds set on them.

DAILY NEWS LETTER
Gossip of Staff Correspondents at World Centers of Population

London, Apr. 18.—(I. N. S.)—The king and queen are preparing to make a gesture of friendship to the United States.

A garden party will be given at Buckingham Palace in June by the king and queen for the members of the American Bar Association and the Canadian Bar Association, who will then be in convention in London.

This is a most unusual procedure, as the king and queen rarely attempt to entertain foreigners on a large scale.

It is also a considerable gesture because of the fact that the expenses of the royal household are rather rigidly provided for, and the expenditure for this garden party may come from the private funds of the king himself.

The summer garden parties at Buckingham Palace are eagerly awaited by the English society folk, and the fact that Americans are to have a party all to themselves has caused no little discussion, particularly in those circles where there is bemoaning of the scarcity of tickets for the usual garden parties.

The king always takes a lively interest in Americans, and is said to be looking forward to the meeting of the American lawyers with a great deal of interest. The queen also is interested in America and never allows an American to be presented to her without asking a few questions concerning life and conditions in the new world. It is one of the queen's great ambitions to visit the United States, but it is doubtful whether this will ever be arranged, as the demands upon the reigning sovereigns in their own empire are too great.

The Prince of Wales' side of the controversy over the advisability of his being permitted to engage in racing has been finally presented. When the Prince took his last fall the newspapers of England came out with positive demands that the prince give up racing. After every argument had been advanced one paper came out with a defense for the prince, and there are intimations that the defense was inspired by the prince or those close to him. "We don't want a mollycoddle for a prince," the newspaper declared, and went on to argue that the prince has won his great popularity by the very fact that he had engaged in the sort of life that England's best sporting men engage in.

Queen Mary is engaged in supporting an effort to change the feminine styles. The queen is greatly interested in the lace industry and particularly in the Nottingham lace industry. Present modes and fashions exclude the use of lace and the industry in England has reached a low level. The queen is doing her utmost to encourage the use of lace and to bring its use into fashion.

King George is preparing for his annual summer vacation—the one that he enjoys most. Every summer the king spends five days with the fleet at sea, and inasmuch as he has always loved the sea, it is said that he looks forward to these five days with the greatest anticipation.

There will be a great deal of royal entertainment in London this summer. The king and queen of Italy

will come to England in May, and there will probably be visits from the king and queen of Belgium, and possibly from the king and queen of Spain.

DATE FOR TAX HEARING IS SET FOR APRIL 23

Salem, Ore., Apr. 18.—(A. P.)—Upon receiving the state's notice of appeal yesterday in the state income tax case the supreme court set the date for the hearing in the supreme court for Wednesday, April 23. It is understood the case will be hastened through the higher court.

Following a hearing of the case yesterday, in which the Standard Lumber company demanded that the state be restrained from exacting an income tax return and payment from the company, the circuit court granted a permanent injunction. This was in addition to upholding the previous decree of Judges Kelly and Bingham, who held the act unconstitutional as far as it applies to all corporations.

Three Pots of Kobang. The Maruhachi family of Tokyo, who operated a drug house of old established fame, had received and transmitted from generation to generation a sealed instrument, with instructions that it should be opened only if the family house fell into straitened circumstances. The packet was rescued during the earthquake and it was found to contain instructions to dig at a certain place. Three earthenware pots of kobang—oval-shaped gold coins of feudal days—were found, valued at several hundred thousand yen.

COMING EVENTS

- April 19, Saturday—Cooked food sale by Wassa Ayita sewing club, at Pardee & Gebers Grocery.
- May 6, Thursday—Better Music Week Concert.
- May 16, Friday—Primary Election.
- May 17, Thursday—May breakfast by Womens Association of Bethany Presbyterian Church.

One of those "wholly satisfying" places found once in a while and never forgotten. Finest of meals, and perfectly appointed cabins, early reservations suggested. Sunday dinners by appointment only. Phone for reservations on Saturdays. 66tf
- FOR SHADE TREES—Plant Franquette Walnut trees now. We have 8-foot trees. At Jordan's Nursery, North Tenth St. 74
- CALL 155-Y for dry slab wood, also body fir, yellow pine, oak and laurel. C. W. Lambrecht. 75
- MASSAGE—Violet Ray, Electric Garment; women and girls only. 406 1/2 E. upstairs. 67tf
- FOR SALE—Nice hofter, just fresh, one of the right kind. Reasonable. J. F. Webster, mile west of town. 78

GET PAID ON OWN TIME EDICT TO DENVER FORCE

Denver, April 18.—(I. N. S.)—"Stack your chips on your own time," is the latest order of the city of Denver to its employees. Manager of Revenue Clem Collins has announced that employees must call at the city auditor's office for their wages after working hours. The custom has been for years to permit the workers to take time out of their regular work to go to City Hall for their pay. The new plan will save the city \$10,000 annually, according to Collins.

New Use for Cigarettes

Mexicans working in a lead mine in Chihuahua have found a new use for cigarettes. The mine consists of a series of caves along the sides and bottoms of which lead and silver ore in paying quantities is found. The miners have noticed that smoke from their cigarettes is sucked through cracks in the rocks at certain points. By drilling in the wake of the smoke, they break through into another cave. This method of tracing ore has been followed through a series of caves and still the smoke passes out at the end of the last cave discovered, indicating that there are other caves ahead.

Lights to Test the Dye

Of foreign origin a new machine called a fadeometer is used for testing the fastness of dyes. Violet carbon arc lights are used, 40 samples being tested at one time if necessary. Half the sample is exposed to the light, and the other half protected by a metal shade, so that after test an exact comparison can be made. Special carbon rods, impregnated with a secret chemical formula, give the light of this arc fading qualities exactly similar to daylight, although greatly intensified.

Has Odd Leap-Year Watch

John J. Kingsley of Boston, a jeweler, has what is known as a leap-year watch. It contains a wheel, very tiny in proportions, that makes a complete circuit only once in four years, although it is "running" constantly. This leap-year wheel is one of more than 3,000 parts in the rare timepiece. At midnight on the 28th day of every leap year, February, the figures "29" flash on the dial. This watch also strikes the hour regularly. The cost of making it was \$10,000.

Movies of Undersea Ruins

Motion pictures of undersea ruins of dead cities along the north African coast were recently taken by archaeologists in airplanes. The films have been declared to be more satisfactory than anything that could have been obtained from the surface of the sea. By this means the course of a sea wall submerged to a depth of 5,000 fathoms was accurately traced.

POULTRY

EGGS FROM PULLETS POOR FOR HATCHING

Pullets never should be used as brooders unless they are early hatched and handled under the most favorable conditions, says Noel Hall, extension specialist of the Missouri state poultry experiment station, at Mountain Grove, Mo.

The following are the essential points in producing hatching eggs from pullets:

First, the pullets should be early hatched. It is necessary for the fowls to be mature for the best results.

Second, they must have been raised properly—they must be well developed. Eight-months-old pullets that have been fed and housed properly are better than twelve-months pullets handled under unfavorable conditions.

Third, the pullet should be brought into lay early in the fall and winter and allowed a rest before breeding season. This allows them to be in good physical condition for the production of hatching eggs.

Fourth, a good ration should be fed throughout the winter, but the pullets should not be forced for production. The breeding ration should contain about three-fourths as much protein as the laying ration.

Fifth, the pullets used as breeders should be supplied an abundance of green food. It will pay to use alfalfa meal or sprouted oats when other green feed is not available.

We are prone to attempt two businesses in one. Commercial egg production and good hatching eggs seldom come from the same flock at the same time. Best results are secured from the flock handled especially for one or the other.

Pullets to be used in the breeding pens next spring should be culled carefully and placed in separate quarters. Then they should be fed on a breeding ration and not forced for production.

Breeding from pullets is to be discouraged. It is generally conceded that the best results are obtained from hens that have completed one laying year. However, with special care, good results can be secured from well-developed, vigorous pullets if they are not forced for production.

Substitutes for Worms and Bugs During Winter

In order to maintain good egg production during the winter months the flock owner or attendant must reproduce as nearly as possible those conditions which exist at the season of heavy egg production, say the Nebraska Agricultural college poultrymen. Because of the abundance of

bugs and worms during the spring months, and the entire absence of them now it is absolutely essential that some substitute for them be provided. Such substitutes are known as "animal feeds" and include meat scraps, tankage, and ground bone. This dry mash mixture should contain 15 to 20 per cent of meat scraps or high-grade tankage. If skim milk or buttermilk is available the percentage of other animal feeds may be decreased somewhat.

Hens With Cold Feet Do Not Produce Many Eggs

With eggs bringing exceptional prices the object of the poultryman is to get his hens to lay the largest possible number of eggs at a minimum of expense, and one way to gain this end is to keep the feet of hens warm, says A. C. Smith, head of the poultry division at University Farm at St. Paul. "Hens with cold feet do not lay," adds Mr. Smith. "Frozen ground, snow and mud make cold feet. A dry floor in the hen house with from four to eight inches of straw in which the hens may constantly scratch will not only keep the hen's feet warm but will help to insure good health, which is absolutely essential to egg production."

Eggs for Hatching Need Most Careful Attention

Under average conditions it is not desirable to keep eggs that are to be used for hatching longer than ten days. Satisfactory hatches may be obtained after keeping them over three weeks if they are carefully turned and kept at a temperature of about 50 degrees Fahrenheit. Experiments show that the longer the eggs are kept the lower will be the percentage of chicks.

The eggs should be turned once a day. Eggs shipped from a distance should be carefully unpacked and left in a quiet place 24 hours before being placed under hens—E. J. Peterson, North Dakota Agricultural College.

Sixty Per Cent Hatch Is Considered About Right

If you buy eggs for hatching, don't look for 90 or 100 per cent hatches. Breeders are, as a class, conscientious, and will sell what they believe to be fertile eggs, from good stock. But even from the healthiest of fowls and of the highest quality, there will be chicks off-colored and defective in some points. A 60 per cent hatch is good, and if half of these prove good birds in color and shape it will be a good hatch.

Binder for Cigars.

Chemists of Lehigh university have just perfected a binder for use in cigars which it is claimed will permit carrying a cigar in the pocket without fear of breaking it under ordinary conditions.

One or two drops of tincture of iodine will vanquish germs in a quart of unsafe water within 20 to 30 minutes.

See the new Ideas in Easter Suits At Jim's Toggery "Fresh Every Morning" Plan!

Don't satisfy yourself with ideas and models that have been hanging on hangers from two to twelve months.

There is a new shipment of Easter suits opened every morning at Jim's Toggery.

Pop—Every morning goes the strings on a new package—and out of tissue paper spring models and materials so advanced that our artist has hardly had time to sketch them.

Tuesday, Wednesday, Thursday, Friday and Saturday—five big shipments to keep you up to the minute even tho' you want to wait until the last minute.

Come today—come tomorrow—you'll see many Grants Pass men welcoming these new arrivals in Value First Suits.
