NOTICE OF SALE OF GOVERNMENT TIMBER
General Land Office, Washington, D. C., Mar. 11, 1924.

Notice is hereby given that subject to the conditions and limitations of the acts of June 3, 1916, (39 Stat., 218), February 26, 1919 (40 Stat., 1179), and June 4, 1920 (41 Stat., 758), and departmental regulations of September 15, 1917 (46 L. D., 447), and June 22, 1920 (47 L. D., 411), the timber on the following lands will be sold April 21, 1924, at 10 o'clock a. m., at public auction at the United States land office at Roseburg, Oregon, to the highest bidder at not less than the appraised value as shown by this notice, sale to be subject to the approval of the Secretary of the Interior. The purchase price, with an additional sum of one-fifth of 1 per cent, thereof, being commissions allowed, must be deposited at time of sale, money to be returned if sale is not approved, otherwise patent will issue for the timber which must be removed within ten years. Bids will be received from citizens of the United States, associations of such citizens and corporations organized under the laws of the United States, or any State, Territory, or District thereof only. Upon application of a qualified purchaser, the timber on any legal subdivision will be offered separately before being included in any offer of a larger unit.

WILLIAM SPRY, Commissioner, General Land Office.

NOTICE OF BOND SALE
Notice is hereby given that sealed bids will be received by the undersigned until the hour of 2 o'clock p. m. the seventh day of May, 1924, and immediately thereafter publicly opened by the board of directors of the Willow Valley Irrigation District at the office of said board, being the residence of A. C. Duncan, near Lorella, Klamath County, Oregon, for an issue of bonds of said district in the sum of \$20,000.00, maturing serially as follows: \$1400.00 five years after date of issue; \$1500.00 six years after date of issue; \$1500.00 seven years after date of issue; \$1500.00 eight years after date of issue; \$1600.00 nine years after date of issue; \$1600.00 ten years after date of issue; \$1700.00 eleven years after date of issue; \$1700.00 twelve years after date of issue; \$1800.00 thirteen years after date of issue; \$1800.00 fourteen years after date of issue; \$2000.00 fifteen years after date of issue; \$2000.00 sixteen years after date of issue; \$2500.00 seventeen years after date of issue; \$2500.00 eighteen years after date of issue; \$2500.00 nineteen years after date of issue; \$2500.00 twenty years after date of issue.

Said bonds to bear interest at not to exceed 6 per cent per annum, payable semi-annually, principal and interest to be payable at the office of the County Treasurer of Klamath County, Oregon, or at the fiscal agency of the State of Oregon in New York City at the option of the holder.

All bids must be accompanied by a certified check for 5 per cent of the par value of the bonds bid for and must be unconditional.

The legality of the organization proceedings and the authorization of the bonds have been confirmed by the Circuit Court of the State of Oregon for Klamath County.

The Board reserves the right to reject any and all bids.

A. C. DUNCAN, Secretary.

Address: Lorella, Oregon. 86

TO WHOM IT MAY CONCERN:
This is to certify that the manager of the Consolidated Greenback Mines Co. is hereby given authority by the Sheriff's office of Josephine County, Oregon, to take possession at and secure the return of all property unlawfully removed from the Greenback Mine. Any person or persons having in their possession any property unlawfully removed from said mine will be given 30 days from date to return same to the property from which it was removed. Failure to comply with the above will result in the arrest of any person or persons having such property unlawfully held in their possession.

Dated April 15, 1924.
(Signed) W. D. HOWARD, General Manager, Consolidated Greenback Mines Co.

NOTICE
Anyone found dumping refuse on Chicago Land Co. grounds will be prosecuted to the full extent of the law. This also applies to those cutting wood. Any stock grazing will be impounded.

S1 CHICAGO LAND COMPANY.

OHIO Metal Worker a Victim
Ray S. Ball, Huron, Ohio, was a victim of coughs and colds. Both he and his sister suffered with them, but found "speedy relief" through the use of FOLEY'S HONEY AND TAR COMPOUND, the old favorite cough remedy. He writes: "I have found FOLEY'S HONEY AND TAR COMPOUND a most excellent remedy for coughs and colds. My sister had a severe cold and cough a year ago and found 'speedy relief' in FOLEY'S HONEY AND TAR COMPOUND." Couch's Pharmacy, Adv.

Nose Dive Not Serious With Enough Altitude

What is known as a "nose dive" is the evolution of an obsolete plane maker when out of control, when it has lost flying speed. This is not always done intentionally by the pilot, although it is a favorite stunt performance of exhibition pilots. In a nose dive a plane is falling out of control because the elevator, ailerons and rudder are in such a position with respect to the slip-stream that they are inoperative.

This condition, however, is easily overcome, provided the pilot has sufficient altitude, for with ease he can regain a renewed grip of his control on the slip-stream and regain his normal flying position. However, with obsolete planes the pilot is often fearful near the ground, or his control are not as sensitive as they should be and he unfortunately fails to recognize the fact that he is losing his vitesse. A plane stalls at the beginning of a nose dive and hits the ground before the pilot is able to recover. Most accidents, as you have probably observed, are what might be termed "100-foot accidents," and in almost every case where the pilot had an altitude of over 300 feet, he would recover before hitting the ground, perhaps lighting with only minor breakages, if any.—Maj. W. G. Schaeffer, in Advertising Magazine.

Commercial Wax Obtained From Numerous Sources

The list of things for which wax is used is long and constantly increasing. In the main, commercial wax is obtained from plants, from mineral oils, such as petroleum, and from bees. But there are some other sources. Many plants have a thin film of waxy material that covers the leaves and seems to protect them from too rapid evaporation.

The paraffin of commerce, so widely used, is obtained from petroleum, shale oil and lignite, says the Detroit News. Today petroleum is the chief source, although only certain kinds of oil produce marketable quantities.

In obtaining paraffin from petroleum a freezing mixture is applied, which reduces the temperature of the oil sufficiently to separate it into crystals. Ozocerite is an interesting wax, found in a solid state in beds of coal or associated bituminous deposits. It is related to paraffin and when pure is of similar color and texture.

Beeswax is a wax of very high quality. The comb is carefully saved and shipped by the beekeepers to the market. Spermaceti is a white wax of crystalline structure obtained as a solid precipitate from the head oil of the sperm and bottlenose whales, and to a lesser degree from sharks and dolphins.

Not What She Thought

Little Tommy Truffle had made a discovery and, being of a very generous disposition, was eager to share it with others.

"I is—" he began.

Teacher swooped down at once, that superior smile, so irritating to the sensitive mind of youth, upon her lips.

"I am, not 'I is,'" she corrected.

Tommy looked a little pained; almost, perhaps, a little doubtful. But he was an obedient little boy.

"I am the null letter of the alphabet," he announced.

School for Sick Pupils

A special hospital school, maintained as part of the regular school system of Minneapolis for children who have tuberculosis, is described in the January number of School Life, published by the United States bureau of education. Children excluded from the regular schools on account of having this disease are required under the compulsory education law to attend this school if they are able to travel to and from school every day by street car. Regular work of the eight elementary grades is offered, and pupils may be transferred to this school or back to a regular school without loss of standing.

Classes are held in open-air rooms, which are kept at a temperature of 45 degrees. The children wear Eskimo suits and a full meal is served during the day, and after the full meal the children have a sleeping period. "Sun-lamp treatments" are given every morning. Children requiring hospital treatment for a short time are placed in a ward and are attended by a physician and a nurse.—Chicago News.

Sealed proposals will be received by Edward S. Van Dyke, Clerk of School District No. 7, Josephine County, Grants Pass, Oregon, until 5:00 p. m. Monday, May 5th, 1924, for the General Construction and Mechanical Equipment of a High School Building, to be built at Grants Pass.

Separate bids for: Construction, Wiring, Plumbing and Heating will be taken.

Construction work comprises remodeling of present building with new additions at each end.

Meeting of Board of Directors to be held on day and hour aforesaid, in office of Clerk of Board, at which meeting the bids will be opened.

Plans and specifications may be obtained at office of clerk of School Board, Grants Pass, Oregon, or of Tourtelotte and Hummel, Architects, Falling Building, Portland, Oregon.

A certified check or bidders bond for the amount stated in proposal form must accompany each proposal and same to be made payable to Edward S. Van Dyke, Clerk of School District No. 7, all in accordance with the specifications for said work.

The Board of Directors reserves the right to reject any and all bids.

P. P. PROCTOR, Chairman.

Attest: EDWARD S. VANDYKE, Clerk.

Community Building

Scientific Planning for Healthy Growth

A committee of twenty-one meeting at the City Club in Chicago to draw up specifications for a metropolitan planning commission forecasts a Chicago of 8,000,000 population extending, roughly, from near the Indiana state line to a point near the Wisconsin line. We believe that is no wild dream. It is a possibility, if not a probability.

But whether or not Chicago proper ever extends its present boundaries, there can be no doubt that definite, scientific planning is essential to insure healthy and continuous growth. The Chicago Plan commission has worked with admirable good sense and efficiency. But problems of modern city life which have arisen since its inception have greatly complicated its task. The automobile traffic and the tendency to concentrate both business and residences in high buildings convenient to a central district impose a new duty upon city planners.

We are inclined to be archaic in our ideas. Athens and Rome and Constantinople were planned and built upon one level. American cities, constructed many centuries later, have hardly advanced from that.

In Chicago, with the limited exception of elevated railroads, the Michigan avenue two-level street, and tunnels beneath the river, we are still on the one-level basis of ancient Athens. New York has gone a step further with the subway, and eventually we will have that. But even that will not be enough.

There can be no adequate planning for a modern great city which does not provide for more than one level for traffic. Chicago knows it, but that is not enough. It must act upon the knowledge. New York knows it, and is acting. Steps are being taken there to provide a third level of transportation, for pedestrians, above the ground. The entire city has been zoned, with groups of architects in charge of the various districts, to work out this plan. The colossal plan of adding some 4,000 acres to the lower end of Manhattan island includes the construction of three street levels—one for heavy vehicular traffic, a second for passenger automobiles, and a third for pedestrians.

Chicago must come to it. The committee of twenty-one may properly plan for a city fifty miles long and of 8,000,000 population, but it should not neglect to plan first for a city of our present area, but three or more stories high in so far as its streets are concerned.

Rabbits Destroy Vegetation.
Scientists of the United States agricultural department are introducing plants on Laysan Island of the Hawaiian game preserve in an effort to restore vegetative conditions completely destroyed by rabbits.
