THURSDAY, JUNE 19, 1924.

OREGON WEATHER Pacific Coast States: Generally fair in California and Southern Oregon, and probably occasional showers elsewhere. Temperature near normal. Fair and warmer tonight and Friday.

REFORESTATION BILL NOW LAW

President Coolidge signed on June 7, the Clarke-McNary reforestation bill, the first act ever passed providing for a forestry policy for the nation. The new act lays the foundation for a sound system of forestry and forest protection in this country. This is the measure for which efforts have been made steadily for five years by federal, state and private foresters, by forest protective associations, by lumbermen, timber owners and business men of the United States.

The Act is a recognition that the federal government, states and the private timber owner each have an interest and a responsibility not only in the protection but the perpetuation of the forests of the nation and that each should bear its share of the cost, forest owners state.

The fact that there are 81 million acres of denuded and idle forest lands in this country, that 19 million acres are being cut over each year, that about 22,000 forest fires occur annually sweeping over 7 million acres, that we are cutting and let burn up our forests five times faster than we are growing them, are some of the things that make the Reforestation Act of 1924 of vital importance.

Civil Improvement Is Object of "Rotarians"

The Rotarians are members of the Rotary club, which was formed in Chicago in 1906 by four men—a coal dealer, mining operator, merchant tailor and lawyer. "Rotary" was chosen for the name of the club because the members met in "rotation" at their places of business. Civil improvement was the object of the club and the motto adopted is: "Service above self—He profits most who serves best." Other clubs were soon organized in other cities and in 1910 a convention was held in Chicago at which a national association of Rotary clubs was formed. Two years later in order to include clubs from foreign countries the association was made international. At the beginning of 1923 the membership of the association totaled over 83,000. Membership in a local club is restricted to one man from each business or profession. A new club must start with not less than 15 or more than 25 members. The clubs are grouped in districts, each district electing a governor to represent it on the international board, which meets in Chicago every 60 days. The Rotarian, a monthly published at Chicago, is the official publication of the organization.

DAILY NEWS LETTER

Gossip of Staff Correspondents at World Centers of Population

Philadelphia, June 19.—(I. N. S.)

Upon the broad shoulders of four stalwart Americans will rest the task of defending the supremacy of the United States on the polo field when England's quartet invades this country in the fall for a series of international matches.

The four players who will carry the burden of the cup defense play have not been selected. The best pony poloists in the country are taking part in international trial games in the East to give the committee in charge a chance to pick the most likely looking men.

Four matches were played here in which stars of former years battled against rising youngsters who are fast making names for themselves in the polo world.

Devereaux Milburn, probably the greatest player of all time, here or abroad, took part in some of the games. There were rumors early in the season, as is always the case in every branch of sports, that "the old order" had changed and that the veteran of 25 years experience was slowing up.

None who watched him, as he made spectacular play after play, thought he was slipping backward. In one contest his Meadow Brook team, having given one point to the Orange county quartet through handicap, was in need of one goal to tie the score, with only a minute to play in the last chukker. A foul was called on one of the lads who wore the Orange blouse. It was then that Milburn showed his old steadiness as his pony trotting back beyond mid-field, he squared away and smashed the willow-pith sphere through four opponents and between the uprights from the 50-yard mark.

In the last few years pony polo has gained much headway in the Eastern States, and it is rapidly working its way Westward, where some day it may be as popular as it is along the Atlantic seaboard.

Colleges are rapidly taking it up and making it one of the major sports. At the present time Penn. Princeton, Cornell, Yale and other universities, as well as many "prep" schools, have pony polo teams. These players, after their college experience, develop into possible international stars—so polo cannot very well die out, with a fresh crop of players being developed constantly.

There will be four or five matches played between the English invaders and the American defenders who captured the international cup two years ago. The opening matches will be held the first week in September on the Meadow Brook field here.

On the defense committee, which will select the players, are Harry Payne Whitney, Lewis Stoddard, Milburn, Major Robert E. Strawbridge and W. A. Herriman. The line-up will probably be announced, some time in August.

Some of the players have their peculiarities. Just as Ty Cobb always touches second base as he comes in from the outfield and as Eddie Collins used to scatter all of the bats in front of the dugout before he went to bat when runs were needed, Malcomb Stevenson, rated close to Milburn as a player, always throws his helmet to the ground at the end of each chukker. He lets someone hand it to him as play is resumed.

M'ADOO LEADS OWN FORCES IN HIS CAMPAIGN

OPPOSITION FEELING AROUND FOR AN OPPONENT FOR THE NOMINATION

HEADQUARTERS ARE OPENED

Democrats of the Nation Are Now Gathering in New York For Convention

New York, June 19.—(A. P.)—With William Gibbs McAdoo in executive charge of his campaign here, and new headquarters opened for Governor Smith, political maneuvering became more intense today.

Anti-McAdoo leaders discussing possible opponents suggested Senator Pat Harrison, of Mississippi, as a possible presidential democratic nominee. Other possibilities, some of whom have already opened headquarters, include Oscar Underwood, John W. Davis, Carter Glass, Samuel L. Ralston, and James M. Cox.

ADDITIONAL LOCAL

Montana Picnic

The third annual Montana picnic will be held at Riviera park on Sunday, June 29, and all former Montana residents are urged to fill lunch baskets and spend the day. Picnic dinner at noon. Riviera park is on the Pacific highway 12 miles south of Grants Pass.

Visitors From Berkeley

Mrs. Geo. Bancroft's daughter, Mrs. Harry L. Newell and two sons, and Mr. Newell's mother, Mrs. S. D. Newell, of Berkeley, Calif., are visiting Mrs. Bancroft for a month or so. Mr. Newell will arrive the 1st of July.

W. C. T. U. Meets Tomorrow

The W. C. T. U. will hold its meeting tomorrow afternoon at 2:30 at the home of Mrs. Amos Myers on Savage street. There will be cars at the Courthouse at 2:15 to take the members and friends up there. It being flower mission day all members are requested to bring flowers for the sick and shut-in.

Grading Is Finished

The grading on the Crater Lake highway has been completed and the rocking will start about July 1, according to J. G. Bromley, highway engineer. The road will be gravelled from McLeod to Prospect. The macadamizing of the highway is in progress between Medford and McLeod.

CHICAGO BUTTER, steady, 39c; likely unchanged.

STRAIGHT-LINE DAY DRESSES PRESENT SMART VARIATIONS

Next to the tailored suit in importance, rank those simple and indispensable all-day dresses, made of the various crepes, satin crepes and light woolsens. They are just unpretentious enough to fit in almost anywhere and so cleverly varied as to be endlessly interesting. Their ranks have grown this spring by the addition of silk alpaca to the materials used for them—with barred and striped flannel at one end of the line, satin crepe at the other and alpaca between, there is chance for even greater diversity.

(fabrics adheres to the slim-and-straight mode, following the lines of the figure closely but allowing the introduction of smart details for the sake of variety. Fullness at the sides, shaped bouffants, panels, platings and tiered skirts, bloused bodices, washes, different neck treatments and varied sleeves are among the things that contribute individually to frocks of this kind. The pretty model pictured of satin crepe is a fine example of up-to-date designing, having tiers of the satin tucked in groups, a bloused bodice and an engaging neck finish which includes embroidered ties. Many models have flaring sleeves and some of these are supplemented by lace or batiste or net undersleeves with wrist bands. Lace collars and jabots, sashes and decorative girdles are among other accessories that provide interest and color contrast to the day dress and high-colored pipings are popular on the dresses of barred or striped flannel. A very handsome model of black, or dark, satin crepe, is plain and straight, fastened from neck to hem at one side, where a frill of platted crepe and a long line of mother-of-pearl sequins in white with white embroidered batiste collar give it enviable distinction.

DRESS UP! Friday is the First Day of Summer!

June 21st is an awfully poor day to look like the last day of Summer—when Summer is just beginning.

The year's most beautiful season coming in—

New awnings going up—

New flowers coming out—

New people coming to town—

And here are the trim new fashions to make you as happy and gay as a lark.

Stocks here—as complete as a Bride's kitchen—all as new as this morning's ice—and priced at figures to make you glad to pass up a dozen other places to place your order here.

Michael-Stern Suits \$32.50

Manhattan Shirts \$2.50

POWER Plus—

The World's Largest Producer of Quality Automobiles

—plus extraordinary riding comfort—the comfort that comes of correct design; scientific balance; plenty of room in both the front and rear seats; deep, luxurious cushions and long, strong, resilient semi-elliptic springs.

fully precisioned cylinders and pistons, perfectly balanced reciprocating parts, and specially prescribed Studebaker steels.

—plus instant get-away, smooth, vibrationless performance at all speeds; a feature due to a specially designed crankshaft, machined on all surfaces—a feature found in no competitive car under \$2,500.

—plus obvious quality in every detail: hand-tailored top and side curtains; lasting, durable, genuine leather upholstery. Carefully selected fittings, lustrous black enamel finish.

—plus long life and dependability, due to four large crankshaft bearings, care-

These are a few of the "plus" features that make the Studebaker Light-Six an investment—not merely an expenditure. A car of recognized value that commands, at all times, the top price and ready sale in the used car market.
