MINE AND MILL SUPPLIES

Machinery and Heavy Hardware. P. S. WOODIN. Phone 42 511 H St.

AMUSEMENTS

"The Dope Evil"

Truly, a sermon in a theatre, truly a great moral lesson and more truly yet, a really beautiful play, was "The Dope Evil" as presented by The Evelyn Kincaid Dramatic company at the Tent Theatre last night.

The large crowd sat enthralled at the marvelous work of Miss Kincaid as "Dopey," and at times the silence was so intense, the interest so great, and the story so absorbing, that one was almost afraid to break forth into applause, it seemed so like a sermon by a wonderful preacher.

No better straight dramatic work has even been seen here in Grants Pass before than was seen last night in the work of Miss Kincaid as "Dopey," the boy dope fiend, and Mr. Burton as the minister, while as clever, a piece of emotional acting as one would wish to see anywhere was the work of Mr. Callioote as the father.

Both Miss Miller and Miss Moore, as the little sister and the mother, played their parts to perfection.

The entire cast of this company had good parts and each one seemed to enter into the spirit of the play and for a few moments really lived the parts they played.

So near like a church service was this play, the specialties were not given between the acts, neither was the candy allowed to be sold, but from the first entrance music to the fall of the last curtain, the members of this company ceased to be actors delineating a part, but were actors living a part.

Already, numerous requests have been made for a repetition of this play before the company leaves. 51

Stays Another Week

On Mr. Burton's announcement last night at the tent theatre that "The Kincaid Dramatic company would remain in Grants Pass for another week" the large audience broke forth into spontaneous applause, and it so pleased him that he immediately decided to let the ladies in free again tonight, under the usual conditions.

The play is "The Girl of the Golden West," a romantic story of "The Days of Old, the Days of Gold, the Days of '49."

This story is too well known to need any particular newspaper boosting; suffice to say that the Kincaid company is equipped to properly present it both with a competent cast and with sufficient stage properties and scenery.

An added attraction and one that will advertise Grants Pass all over the coast, is the fact that there will be made a flashlight of the crowd, and this picture will be made into a cut and used in the company's advertisement.

What the World Is Doing

As Seen by Popular Mechanics Magazine

AT LAST—THIS IS SOMETHING LIKE IT. What a cast—What a story! Bebe Daniels, Ernest Torrence, Noah Beery and Lloyd Hughes featured in the Zane Gray Paramount production, "The Heritage of the Desert," which is packing them in at the Rivoli theatre where it was shown for the first time last evening. James Mason, Richard B. Neill and Leonard Clapham play in support. So much for the cast.

Now to the story: A tale of the west at its wildest and wooliest. There's thrills, comedy, a pleasing love theme and big scenes throughout. With the killing of Snap, the dissolute son of August Naab of "The Oasis" ranch, the long-kindling feud between cattlemen and rustlers breaks into flame. It's a battle to the death—with Navajo Indians collecting scalps for the ranchers. The town of White Sage is but a thing of the past—Holderness and his reign of terror are but memories—great things have started in the west—ambitions are about to be realized. The irrigation waters, the life-blood of the desert, on "The Oasis" have been saved—fertility is about to come to the land. But why go on? Zane Gray tells it.

Theodora Pool, 13-year-old girl of Michigan, won the second national safety essay contest over 400,000 American school children.

Official reports show that 1,040,000 refugees have been poured into Greece during a twelve months' period.

Hundred Miles an Hour Birds Fly Day without Stop. Flying at a rate of a hundred miles an hour, some birds can continue on the wing for a day without stopping. The vulture, it is said, can travel great distances at this speed and often stays in the air for a full day of flight. Many wild ducks and similar fowl attain almost as great speeds when migrating, while, among smaller birds, the swallow has been known to reach ninety miles an hour and to keep up that record for long stretches.

The eagle, despite its strength and big wings, seldom flies as fast as a mile a minute. The crow, though seeming to be a slow mover in flight, makes about

the postoffice department is said to be proof against the weather and rust. Providing ample space for the postal matter of three persons, the container has an overhanging roof to prevent rain or snow from seeping inside. The supporting pedestal of the same material is molded to the box. Entrance is gained through strong metal doors securely fastened in the cement.

Ornamental Handles for Auto Doors. A number of the lower-priced automobiles have the inside handles of door catches made in a very rough style. The crude appearance of these handles can be improved considerably by dressing them down on an emery wheel or grindstone so that the dust caps used on automobile valve stems will fit over them snugly.

Ten Dozen Pies from One Pumpkin Are Served at Banquet. One plump pumpkin, grown in a California field, furnished joy for scores of inmates in an old people's home not long

ago when it was presented to them and made into 125 pies for a dinner. More than sixty pounds of "meat" were extracted from the pumpkin, which weighed nearly ninety pounds as picked from the vine.

Removing Stuck Bullets. A lead bullet stuck in a rifle barrel can be easily removed in the following way: Get a piece of wire of the kind and size used for barrel hoops and long enough to reach the bullet from the chamber end of the barrel. Flatten one end of the wire by hammering it out cold, forming it to a blunt point like a flat drill, and file the edges sharp, rounding off the corners to fit the bore. If a breast drill is handy the wire is tightened in the chuck and the bullet drilled out. If a carpenter's brace is used it is necessary first to flatten the end of the wire to fit the chuck snugly. As lead is very soft it is a matter of only a few moments to drill out the bullet. The rifle should be thoroughly cleaned and oiled before firing a loaded cartridge.

Combination Camp Table and Bench. The combination camp table and bench shown in the drawing is easily made and is more useful than the ordinary table, as the top consists of two boards which can be swung over to form backs for the benches. In their normal

position on the table these two boards rest on pins or cleats fastened to the inside of the upper crosspieces; they pivot at both ends on long bolts passing through the brace, crosspiece and into the board. Both sides of the boards should be smooth, as one side is used as a back rest and the other as the table top.
