CAMPHOR WATER FOR EYES

Nothing has the quick action of simple camphor, witchhazel, hydrastis, etc., as mixed in Lavoptik eye wash. One small bottle Lavoptik helps any case weak, strained or sore eyes. Aluminum eye cup free. National Drug Store.

SPARK-PLUG CLEANER

Stranded copper wire makes a spark-plug cleaner that can be used without taking the plug apart and is harmless to the porcelain. It will not clean the insulator as well as when the plug is taken apart and polished with steel wool, but will serve in an emergency. The best results are obtained when a length of lamp-cord is doubled over and both ends used. The insulation of the wire should not be removed for more than 1/2 in. as it stiffens the end of the wire if left on.

Have to Blame Somebody

GEE! THESE ARE ROTTEN GREENS!

HA HA!

AMUSEMENTS

Valentino is Good in "Monsieur Beaucaire" at Rivoli

The only reason we did not arise last night at the Rivoli Theatre, where "Monsieur Beaucaire," starring Rodolph Valentino, was having its initial showing, and sing "Hail the Conquering Hero Comes," was because from the very first fade-in we were held spellbound by the sheer grandeur of the production. Costumes settings and locations are the acme of lavishness. It is undoubtedly one of the costliest pictures ever made—and well worth it!

Given an opportunity to display his real dramatic ability, Valentino presents a most vivid and impressive performance. His magnetic personality, his fire and energy in his love scenes place him conspicuously in a rank by himself. The story by Booth Tarkington, from which Forrest Halsety made the screen adaptation, is known to most people but it has never been so well told or so grippingly portrayed as in this picture.

Griffin's Minstrel Show Scores Hit

Griffin's minstrel scored a big hit here last night. Good music, harmony, new and snappy jokes and stories.

While all songs were well rendered the honors in solo work fell to Messrs. Leahy, Baird and Flourney. The dancing and chorus work were far ahead of the usual show of this type, and the comedy features of the bill went across big with but little grossness, and a well balanced orchestra is not to be overlooked. The audience was a fair one but a lot of people missed a worth while show, the first of the season and up to the promised standard of the T. & D.—Hanford Morning Journal, Saturday, September 13, 1924. The same show comes to Rivoli Theatre for one performance tomorrow night, Tuesday, Sept. 30th.

Two Potato Crops a Year

By dipping seed potatoes into a solution of nitrate of soda, two crops may be produced a year, says a California professor.

Colored paper at the Courier.

What the World Is Doing

(As Seen by Popular Mechanics Magazine)

Garage Doors That Roll Overhead Save Space and Repair Bills

Garage, factory and warehouse doors that roll up overhead are being manufactured to replace the ordinary hinged or sliding door. They are constructed in panels, somewhat like the roll top of an office desk, and slide on flanged rollers and steel tracks. When the door is opened, it is inside where it cannot be damaged by the weather and cannot blow shut. It is counterbalanced by strong steel springs, locks automatically when closed, fits flush with the floor and is not hard to install. As it does not project beyond the building, it is convenient where the garage or other structure is erected in limited space.

Paint for Cardboard Panels and Coils

An insulating paint, which has been found serviceable for painting cardboard panels and coils in radio work, can be made by anyone at practically no cost. A pint of denatured alcohol is obtained, and an old phonograph record, which is broken up into many small pieces, is dropped into the alcohol. This can be done best in a fruit jar. The cap is screwed down tightly and the mixture allowed to stand for a few days until the pieces of record have been thoroughly dissolved. The mixture is stirred well before it is used and is applied with a brush. The work must be done fast, as the paint dries rapidly, leaving a black film on the surface. Two coats are sufficient for any material. The application stiffens the cardboard considerably and produces a fine dull finish. One pint of the mixture will cover from 15 to 20 sq. ft., and sometimes more.

Rifle Range Target in Golf Net Improves Player's Accuracy

To teach accuracy in driving, a steel golf-practice net has been installed in a Los Angeles club. It has the bull's-eye and circles of a rifle-range target at which the ball is driven. "Slicing" or "pulling" is accurately shown, and distance also may be gauged by the spot the sphere strikes. Being of metal, the net will withstand much abuse and the strongest drives.

Novel Roof Economizes Lumber

Temporary buildings can be roofed much more quickly and with less lumber if the roofing boards are laid across the rafters diagonally, as shown in the illustration. Each board overlaps the one below it in order to shed rain, making the roof practically waterproof. Roofs made in this way have been found quite satisfactory.

Three comets are due to approach near the earth in 1924, astronomers at the naval observatory have announced. They are the Encke and Temple, which will appear in November, and the Tuttle, coming in December. Special preparations are to be made to study them, it is said, as scientists have no means of determining what may have happened to them since they passed out of sight.
