RADIO—RADIO

Supplies, parts and accessories carried in stock for all types of radio receivers.

Our standard receiver for this season is a four tube reflex circuit, non-regenerative and will not bother your neighbor.

It includes three stages of radio frequency amplification, detector and three stages of audio amplification.

It gives the maximum amplification of power obtainable with four tubes.

It is one of the easiest controlled outfits on the market. A single control selects the station. Another regulates the volume supplied by loud speaker.

It is supplied in several models, the small portable receiver to the console type.

All models have the same radio unit and deliver the same power.

The best of standard parts are used in their construction. Cabinets are genuine BOUGHTON built to order in San Francisco.

Prices Range From \$135.00 Up

Depending upon cabinet selection and accessories. Prices mean completely equipped and installed.

Deliveries have been made and the receiver is represented in various parts of Northern California.

Your invitation to demonstrate will be appreciated.

We also repair, rebuild and rewire out-of-date outfits into the latest circuits.

If your present receiver lacks volume, or selectivity, is critical in control, if you are troubled with body capacity effects, if KGO spills over or other trouble is of frequent occurrence, telephone, write or call at our shop.

We will not install a regenerative outfit within the city or other congested district.

Any type of outfit from a one tube head phone receiver to an eight tube Super built to your order.
