Winchester Flashlights

There are several distinctive features about flashlights which bear the name of "Winchester." The lights are the result of a large amount of engineering study aimed at making them as perfect as a flashlight can be made, and at the same time more convenient and more satisfactory to handle.

Winchester Flashlight Switch is a great improvement over the regular flashlight switch. All threads of the Winchester flashlight cases are made of coarser pitch than is customary. This makes it much easier to put the parts together, as a person must do when they change batteries and sometimes on other occasions. There are several other features that Winchester flashlight users are enjoying over the old flashlight.

Come in and let us show you this new flashlight and see for yourself the new improvements this light carries.
