## Winchester Flashlights

There are several distinctive features about flashlights which bear the name of "Winchester." The lights are the result of a large amount of engineering study aimed at making them as perfect as a flashlight can be made, and at the same time more convenient and more satisfactory to handle.

Winchester Flashlite Switch is a great improvement over the regular flashlight switch. All threads of the Winchester flashlight cases are made of coarser pitch than is customary. This makes it much easier to put the parts together, as a person must do when they change batteries and sometimes on other occasions. There are several other features that Winchester flashlight users are enjoying over the old flashlight.

Come in and let us show you this new flashlight and see for yourself the new improvements this light carries.

Stemmler for the purpose of cancelling certain promissory notes. Messrs. Fabry and Mullen allege that their signatures were secured through false and fraudulent representations made by Russell C. Dement, Louis M. Suplee and J. O. Stemmler. They say that representations were made that the money secured on the notes would care for all indebtedness against the Myrtle Point Mill and Lumber Company. But they later learned that the money was used to reimburse the two banks for money paid out on trade acceptances. They also say that the parties represented to them that a note secured by a mortgage from the Myrtle Point Mill and Lumber Company would be taken and that they would be relieved from their individual notes, which was not done.

### Heard a Donkey

During the meeting at McKinley last Saturday Mr. Farr's talk was interrupted by a harsh noise that caused Mr. Wahley, of the State Guernsey Cattle Association, who accompanied him, to inquire if there was a sawmill near. Mr. Farr said there was none but that he thought there must be a logging camp near and it was a donkey engine they heard. It was a regular crescendo which sounded like a saw eating into a plank with a rasping haw and then a shift until the saw took another bite. The joke was on Mr. Farr, however, when the audience informed him that instead of a donkey engine it was a live donkey that was furnished the music.
