

THE IRON PIPE

Story of What C. C. Inman is Doing to Develop Curry County's Gold Resources

C. C. Inman, who returned last week from a three week visit to the latest mines company's camp on the Silver River in Curry county, is quite enthusiastic about the projected operations of this company.

At the present time the company is carrying its efforts on redeveloping the mine, which was partially wrecked by a slide last year.

To give an idea of the magnitude of the project, the following brief data will be of interest. The mine is located about 14 miles from the bridge where the Coos-Curry road crosses the Silver River.

This main pipe line is now over 3,000 feet in length and was built on the ground, or to be more accurate, was built on timber in the entire distance.

The pipe line will be further extended this year in order that two shafts, a half mile below the camp site, may be opened up.

C. C. Inman, general manager of the company, is very anxious regarding the progress of the present winter's operations.

Mr. Inman is also making great plans for his permanent headquarters camp and is at present installing a complete electric plant which will furnish light for both the camp and the mining operations.

The E. E. Johnson mill here returned to the 9-hour day Monday morning, work starting at 7 a. m. and stopping at 5 p. m.
