Mammoth English Walnut

Ex-Sheriff Gage brought in the other day his crop of English walnuts from his 5 trees of Wilson's Improved Seedlings. It consisted of a single walnut weighing one and a half ounces and measuring 5 1-2 inches around one way and 6 the other, which is more than double the size of the common English walnut. But that isn't the whole story. He bought these trees three years ago and the fruit is not only so much larger in size but they have begun bearing in three years instead of taking five as the others do. All the first crop fell off before ripening with but a single exception but that is usually the case with the first crop of all English walnut trees. He also has 10 trees of the common variety, which are 13 years old and have been in bearing for five years and the samples of the crop he gave us were among the finest walnuts we ever saw. He is enthusiastic about this crop and wonders why more people don't plant it in a section like this where they succeed so well.

Celebrated Yesterday

Yesterday was a happy one for the family of E. F. Russell. His mother, Mrs. Helen Russell, of North Bend, came over here to celebrate her birthday with her children and grandchildren, and to make it unanimous the Ladies Aid of the Presbyterian church met with them that afternoon and helped celebrate the occasion. The birthday cake was decorated with candles and another cake with flags in honor of the Armistice Day holiday on whose eve the celebration occurred. While Mrs. W. V. Glaisyer presided at the piano, the company also sang patriotic songs in commemoration of the coming day.

Matchless Weather

All this week so far we have been having ideal weather here with warm sunshine and balmy airs; but for today the morning fog has not cleared. Everyone is, of course, wishing we could have as delightful days for next week's Corn Show festivities; but that is still "in the lap of the gods." Of course there is as much as a three or four to one chance against us on that proposition, but here's hoping the fates will be kind to us.

Many Contagious Cases

Elizabeth Campbell, county nurse, was a caller Wednesday morning. She is finding many cases of diphtheria and scarlet fever these days and thinks that where dairymen who have such diseases in their families continue to milk their cows themselves and market their milk to customers in town there is grave danger that the contagion may be spread by such means.

Has made a remarkable record in the cure of chronic diseases which have been the conspicuous failures of the other methods of treatment.
