May Get State Insurance

A letter received by the Bandon World from the State Industrial Accident Commission states that in response to a petition circulated by A. C. Miller and signed by a number of Bandon citizens, a hearing will be held at Prussia, Oregon, which is the Beaver Hill post office, on December 4th, at 10 a. m. to determine the cause of Joseph Kronsteiner's death.

Kronsteiner's death occurred at the Beaver Hill mine on November 5th, supposedly of heart disease but fellow miners claim that the cause was monoxide gas and that the death was in reality accidental. Deceased's widow and several small children reside on a homestead near Langlois and are reported in destitute circumstances. It is on their behalf that Mr. Miller, former outside foreman at Beaver Hill, and other local citizens have interested themselves. If it is determined that death was due to gas the widow and children will receive the benefits of the state compensation act.

Langlois "Lit Up"

Langlois is "all lit up"—with electric lights. The residents of that progressive town are taking advantage of the opportunity presented by the Bandon hydro-electric department and many business houses and dwellings are being wired. Street lights have been put up and several places are already enjoying the "juice." Others are to be hooked up as soon as the wiring can be done.

Superintendent Hansen reports that the recent cut in lighting rates at Bandon has caused a noticeable difference in the attitude of patrons. He observed it on every hand while making the round, reading meters.—Western World.

Loads Sharply Limited

Division Engineer Wm. E. Chandler of the state highway department, has issued notice of load restrictions on the highway south of Bandon, limiting loads to 50 per cent of the maximum load required by law on all trucks over one ton.

Batten and the twenty-third anniversary of the hosts. After a most delectable chicken dinner the evening was spent with songs and music. The music was interrupted for a while by a christening party which made night hideous out in the north end of town.

The brides were each presented with a Pyrex baking dish, while the grooms were consoled with a china butter chip and a set of ten spoons each. Those present were Messrs. and Madams Geo. N. Batten, W. E. Rosserman, Paul Ramsey, Marc Shelby, Chas. Wilson, H. V. Holverson, Fred Von Peger, Aaron Wilson, Miss Erma Wilson, Levi Wilson and Shelton Von Peger.

Chilean Visits Coos

Alfred Alamos left this morning for Portland. Mr. Alamos is a young man from Santiago, Chile, and has been studying chess and boiler making in this country for several months. He was in Marshfield for several weeks looking over the work at the Mutual Creamery. He will visit in Portland and then go to Chicago, New York and other eastern cities before returning to his home in South America.

While in this country he has mastered the English language, and can speak very plainly. Mr. Alamos says he enjoyed his visit very much as he found the people highly hospitable.

When asked about the Chilean earthquake, Mr. Alamos said that it was not really as bad as the reports indicated, much of that country not even having been disturbed by the quake. His home in the interior of Chile was not harmed.—Times.

Will You Help?

The Sentinel is still ready to forward any subscriptions that we may receive for the Near East Relief fund, and the need seems to grow daily. We wish there was some organized effort here to raise a fund for that purpose to which every one would contribute according to his or her ability. So far the subscriptions have been discouragingly few.

TRAPSHOOTING

The sport that quickens the eye and steadies the nerves. "Pull" calls the trapshooter. From the trap the clay target skims through the air—Bang. The clay target is smashed into fragments. That's trapshooting—the sport that fascinates everybody—that quickens the eye and steadies the nerves. Enjoy trapshooting this season. For good scores always use Winchester shotguns and Winchester Leader or repeater loaded shells. Everything for the trapshooter. Gun cases. Cleaning rods and metal cleaning preparations.
